PATH TO NET ZERO

Our government is committed to the Path to Net Zero to reduce the province's greenhouse gas emissions. At Net Zero, the amount of greenhouse gasses released into the atmosphere is balanced by the amount of greenhouse gasses removed. It can be achieved through a combination of emission reduction (like switching to a heat pump) and emission removal (like planting more trees). We are reaching out to Island residents to let them know about how they can help reduce emissions, while also saving money on your energy bills.

FREE ENERGY EFFICIENCY UPGRADES

Free heat pumps, insulation and electric hot water heaters are now available to income qualifying Islanders. To find out if you are eligible, check online or book an appointment to visit your local Access PEI where staff will assess your income and help you submit your application. Book by calling 1-833-734-1873.

UNIVERSAL ELECTRIC VEHICLE INCENTIVE

The total PEI Electric Vehicle and Charging incentive is $5,750 for EVs and $3,250 for PHEVs. Islanders who buy a new, fully electric vehicle may be eligible for up to $10,750 off the purchase price with the Federal Government incentive of $5,000 and the PEI Universal of EV and Charging Incentive of $5,750 combined. Purchase of an EV at an off-Island dealership is now eligible for rebate.

e-BIKE REBATE

Eligible Islanders and organizations can receive a $500 rebate on e-Bikes (Power Assisted Bicycle). E-Bikes are a cleaner and more efficient mode of transportation when compared to single passenger vehicles. Apply online or with a participating local retailer.

BIKE REBATE

Visit a participating local retailer to get a bicycle rebate of up to $100. No application necessary.

ENERGY EFFICIENCY FOR BUSINESSES, NON-PROFITS AND RENTAL PROPERTIES

There are many rebates available for businesses and community groups to make their buildings more energy efficient, including assistance with purchasing EV chargers, retrofitting multi-unit residential buildings and making small and large upgrades to commercial facilities.

HOME ENERGY EFFICIENCY

We are here to help you save money, save energy and do more for the environment.

We can help you with...

HOME IMPROVEMENT

Rebates, incentives and instant savings to help you save money on your energy bills and make your home more comfortable.

COMPLETING YOUR PROJECT

- Energy efficiency advice through a home energy assessment to get you the right information on how to reduce your energy bills

HOME ENERGY ASSESSMENTS

- $99 plus tax for Islanders

HOME INSULATION REBATES

- Starts with a home energy assessment
- Rebates on air sealing and insulation improvements and ENERGY STAR® windows and doors

NEW HOME CONSTRUCTION

- Start with a building plans assessment before you build.
- Depending on the efficiency, rebates can be up to thousands of dollars

To qualify for the provincial government insulation rebate, you must have an energy audit conducted by one of our energy partners. Contact them directly to begin the process.

ENERGY EFFICIENT EQUIPMENT REBATES

- Savings on ENERGY STAR® certified equipment including heat pumps
- Additional rebates for low income homeowners
- Financing available to help with upfront cost

SOLAR ELECTRIC REBATES

- Contact a Network of Excellence solar contractor to get started
- $1,000/kilowatt installed, up to 40 per cent of installed costs to a maximum of $10,000

WINTER WARMING

- Tenants and homeowners with low-to-moderate income can access free air-sealing and energy efficient upgrades

Financing is available on most home energy upgrades to help you with the up-front costs.

For a heat pump rebate or a solar rebate, get started by contacting a Network of Excellence contractor.
