**ADDENDUM # 3**

**For RFP # 4915**

**TO:** All Bidders

**FROM:** Ian Burge, Manager of Procurement Services

**DATE:** December 4, 2017

**SUBJECT:** Clarifications RFP 4915 - Fibre Network BackBone Design

Section No	Page No	Reference/Subject	Clarification Sought	Response
D.1	30	RFP - Fibre Backbone Design RFP #4915	If a company responds to this RFP and is successful, Is the company then disqualified to participate in the future Design and Build RFPs?	Proponents submitting a response to this Preliminary design phase will <b>not</b> preclude Proponents for the next phases of this project.
Requirement #7	No Page number	Proponent will be required to provide recommendations on technologies which could be considered in the design of the fibre backbone to permit connections for existing PEI ISP's fibre networks, and provide an estimate of costs to implement.	Clarification of requirement for consultations with ISP s during the Preliminary design phase?  Clarification of statement - Proponent will be required to provide recommendations on technologies which could be considered in the design of the fibre backbone to permit connections for existing <b>PEI ISP's networks</b> , and provide an estimate of costs to implement.	For greater certainty, proponents submitting a response to this Preliminary Design Phase should include time and costs in the response to schedule consultations with the current ISPs (approximately 6-8) on PEI to determine general ISP requirements.
