END OF SECTION

Infection Control during construction, renovation, and maintenance of Health Care Facilities

1-Day Course

This course is designed for all health care facility “constructors” (i.e. health care facility staff, contractors, designers, etc.).

Who should participate? The course is designed for, but not limited to, the following personnel: building owners, operators, architects, engineers, designers, hazmat removal contractors, maintenance staff, trade workers (plumbers, HVAC, electrical), health and safety representatives, consultants, estimators and specification writers.

Based on concepts of the CSA Z317.13 standard with the most recent updated 2017 version.

Course Outline:

- ✓ Background and theory regarding Infection Control during Construction.
 - Risk factors (contamination, infection, susceptibility)
 - Roles and Responsibilities
 - Air & water quality (mould & *Legionella*)
 - Selecting construction materials (performance, usage, moisture, etc.)
 - Infection prevention and control measures
 - Multi-disciplinary assessment teams and processes
 - Preventative measures (I-IV)
 - Construction work procedures
 - Inspection / monitoring processes
 - Mitigation (water, containment & abatement of dust, mould, etc.)
- ✓ Practical application of Infection Control during Construction.
- ✓ Hands-on / interactive demonstrations of Infection Control equipment.

Upon completion of this course each attendee will receive a certificate of completion.
