PART 1 – INVITATION AND SUBMISSION INSTRUCTIONS

1.1 Invitation to Proponents

This Request for Proposals (the “RFP”) is an invitation by the Province Prince Edward Island (“the “Province”) to prospective Proponents to submit proposals for the provision of The Bridge Evaluation as further described in the **RFP Particulars (Appendix D)** (the “Deliverables”).

The Prince Edward Island Bridge is a provincial application of the Hub Model of Collaborative Risk Driven Intervention. The PEI Bridge was developed and implemented in late 2016 and is made up of twelve human service organizations. The Hub Model provides a venue for human service providers to detect acute elevations of risk, share limited information, and collaboratively deploy rapid interventions before harm occurs. Following an intervention, members of the situation table (hub table) collectively decide if a sufficient offering of support is in place, closing the situation and allow involved agencies to provide their services. The model has been replicated in a number of jurisdictions throughout the country. In addition to providing an intervention in the situation of risk, the situation table also collects de-identified information on risk factors, demographics, and systemic issues, using a framework adopted nationwide. More information about the PEI Bridge can be found here:

<https://www.princeedwardisland.ca/en/information/prince-edward-island-bridge-model>

In addition to intervening in situations of acutely elevated risk, another key purpose of the PEI Bridge is to contribute to improved community safety and wellbeing (CSWB). As concept, the CSWB is a paradigm that is intended to support human service organizations to shift to more organized approaches in the generation of solutions, fostering evidenced based innovation and contributing to shared outcomes. Shared outcomes are composite needs of the community that are collectively identified and agreed, rather than by sector driven views of need. In practical terms, the paradigm shift is moving from sector based, reactionary measures, and towards upstream, multi-sector collaborative approach.

In an effort to improve collective understanding of the Prince Edward Island Bridge Model of Collaborative Risk Driven Intervention, key stakeholders were mobilized to explore options for evaluation, outcome monitoring, and performance measurement. In order to develop an evaluation framework, several actions were undertaken, and are reflected in the statement of work below, these include: past evaluation results from other jurisdictions; stakeholders consultations to determine their evaluation interests, including input from the measurement community and Situation Table members; an exploration of potential methods; an initial review of current operations and opportunities for improvement; governance and endorsement to carry out evaluation work were confirmed.

The evaluation will report on the formative activities and outputs, as well as inform the ongoing monitoring and performance of the PEI Bridge and its role in contributing to CSWB. Key areas of confirmed interest, to be addressed in the evaluation plan, include: process elements (risk detection capacity, referral pathways, deployment of interventions, service delivery), agency support, impact on clients, service professionals, and agencies, satisfaction, impact on collaboration and risk mitigation practices, outcome monitoring elements.

APPENDIX D – RFP PARTICULARS

D.1 The Deliverables

The Bridge Secretariat, on behalf of the Social Policy Deputy Minister Committee, is seeking evaluation consulting services to 1) design, develop and carry out a formative evaluation using the approved evaluation framework, and 2) provide advice on components of the monitoring and performance management of the PEI Bridge Secretariat going forward and to contribute to the body of evidence on the 'Hub Model'.

In carrying out this work, it is expected that the following questions can be addressed: is risk being mitigated through PEI Bridge activities, are agencies doing a better job of collaborating, are we adhering to the model. The work will be completed through the accomplishment of the following deliverables:

- **Phase 1 Develop, design and lead mobilization to evaluate:** working closely with the Bridge Secretariat, relevant organizations, the evaluation committee, and using information collected to date:
 - develop and confirm with the evaluation committee, a comprehensive understanding of the hub model and the PEI Bridge program;
 - develop a detailed evaluation work plan, confirming evaluation questions, data sources and methods, timelines and clearly identifying project interdependencies;
 - the detailed evaluation work plan will include the key areas of interest: process elements, referral pathways, deployment of interventions, agency support, client and provider impacts, impacts on collaboration and risk mitigation practices, outcome and monitoring elements

The design phase is expected to require the development of surveys, focus group or groups questions and identify focus group composition, in collaboration with relevant PEI Bridge organizations. Sources of information may include situation table process observations, organization information systems, manual collection, key informants, organizational leaders, and service users. Information sharing and confidentiality agreements, consistent and in compliance with relevant privacy legislation and other applicable legislation, are expected to be required to ensure appropriate privacy protections.

- **Phase 2 Data Collection:** working in collaboration with organizations involved in the PEI Bridge,
 - collect in a reliable and validated form, information identified in the evaluation plan (phase 1) from identified sources,
 - likely to include: survey administration, interviews, data from approximately 15 cases where intervention has occurred, and 4-5 from cases where acutely elevated risk was not met but a referral was made, observation of table discussions to determine fidelity/ model integrity
 - identify outcome monitoring and performance management opportunities based on understanding of the Hub Model and data collection of the PEI Bridge.

- **Phase 3 Analysis and Reporting:**
 - carry out analysis of data collected during phase 2 to identify themes, issues, opportunities to continue to improve the PEI Bridge and respond to the evaluation questions as outlined in the introduction;
 - generate evidenced based advice for ongoing outcome monitoring and performance management;
 - disseminate results of the work to key stakeholders;
 - provide the data collected through phase 2 to the Bridge Secretariat in a usable form.

- Organizations which are part of the Bridge, through designated points of contact
- Bridge staff

Project work will be concentrated in the Charlottetown area. Travel to other sites within the province may be required.

D.2 Material Disclosures

The ‘Hub Model’ relies on a four filter process and a determination of risk termed ‘acutely elevated risk’. The terms ‘acutely elevated risk’ and ‘four filter process’, as defined below, are to be relied on in carrying out the contracted work, and not the vendor’s definition of those terms.

Four Filter Process: is the process used to determine the level of intervention and information exchange, driven by a set of agreed upon risk factors.

Acutely elevated risk: Defined as a quick and noticeable elevation of harm that involves high probability of intense harm that crosses multiple human service sectors. Factors to consider are:

- Probability of harm occurring to identifiable individual(s) and;
- Severe intensity of harm – not mere inconvenience and;
- Multi-disciplinary nature of elevated risk – risk factors that cannot be addressed by any one agency or mandate alone and;
- Clear link between disclosure of the information and the prevention or minimization of harm.

D.3 Mandatory Technical, Skills and Experience Requirements

Proponents must demonstrate the following qualifications:

- Knowledge and expertise in multi-sectoral collaboration, in particular multi-sector human services projects (public safety, health, social services).
- Knowledge and understanding of the principles of risk detection and mitigation as they apply to human service interventions.
- Expertise and demonstrated experience in carrying out evaluation and social science research.
- Experience conducting evaluations and research involving complex systems.

- Capable of applying a systems approach in project design, implementation, and evaluation.

Other qualifications considered an asset:

Three references of similar work is a mandatory requirement.

As shown, provide each person’s name, title, role on this project, experience in this role and his/her respective employment status.

Name	Title	Project Role	Role Experience (# months)	Employment Status (E = employee, C = contractor, P = partner)

The Province encourages innovation and competition in the Proponent community through arrangements such as partnerships and consortiums. If sub-contractors or partners of a Proponent are permitted for this project, they must be identified in your table. If so, describe the general range of services that the respective contractors (companies or individuals) provided and how this benefits your company. If no contractors or partners are identified, this will be interpreted to mean that only a Proponent’s ‘own resources’ will be used.

Submit the individual **resumes** for each proposed resource. The resumes should be structured to emphasize their relevant qualifications and experience in successfully completed projects of a similar size and scope to that required by this RFP.

Each resume should include **at least three project references** where the proposed individual served in a similar role, including:

- Name of organization
- Name, title, telephone number and email of a contact for the organization

The Province acknowledges that instances can arise where a proposed resource is no longer employed by or associated with the Proponent, or is otherwise unavailable to the Proponent at the time of the service requirement. In these cases, the Proponent agrees to provide **replacement resources with equivalent (or greater) experience and capability**, and the selection of the replacement resources will be subject to the approval of Government.

In the proposal, describe the process that would be used for including Government in the selection of replacement resources and for securing Government's approval. Describe how changes in the project manager in particular would be handled, if this becomes necessary.

If new service requirements emerge during the project, Government will make every effort to provide the successful Proponent with as much advance notice as possible. Describe the process and typical timelines involved in making **additional resources** available to this project.

Describe the respective impact(s) of these risks on the project itself and/or on any relevant business area(s) within Government, and assign a severity on a defined scale.

Outline risk mitigation strategies.

D.4.10 Added Value

'Added value' is the realization of additional benefits beyond the inherent worth of a good or service. Some examples for services include approach, expertise, references, resources, management, tools and/or methodologies, etc., or a combination of these.

Describe the aspect(s) of your proposal believed to result in notable added value for this project and/or Government as a whole.
