ADDENDUM # 3

For RFP # 5792

TO: All Bidders

FROM: Procurement Services

DATE: October 28, 2021

SUBJECT: Questions and Answers #2

Question 1: Using the table below, are the Province able to clarify the points available for scoring for the following categories?

Categories	Available Points
Software: Subscription Costs	
Software: License Costs for Hosted/on Premise	
Software: Annual Maintenance & Support Costs for Hosted/on Premise	
Hardware	
Integration	
Implementation Costs	
Per Diem rates	

Answer 1: Please refer to 5792_rfp_-_appendix_c_pricing_submission.xlsx The pricing will be scored based on the all the information provided within this document.

Question 2: Are you looking at potentially de-coupling the CDR with IAM elements?

Answer 2: Please refer to October 21, 2021 - Addendum #2, Questions and Answers #35 and #36

Question 3: Are you open to looking at Digital Identity Platform/service separate from the CDR component?

Answer 3: Please refer to October 21, 2021 - Addendum #2, Questions and Answers #35 and #36

Question 4: We have noticed that there seems to be a requirement for a Clinical Data Repository (CDR) but there aren't any functional requirements for one. There are multiple places where it is listed as a deliverable, for example:

- 1.1 Invitation to Proponents – 3) A solution for a Clinical Data Repository (CDR) linked to the Digital Identity and with managed access and consent using deliverable 2 above; and
- D.1.2 Deliverables – 2. Delivers an internally and externally facing FHIR Clinical Data Repository Solution

There does not, however, seem to be any place to enter information about the CDR. Therefore, one question is, **is a CDR required for this RFP or simply the means to connect to the Province's existing CDR?**

Answer 4: A CDR is required and during the proof of concept phase would require a minimum of three profiles (patient, provider and immunization). Following the proof of concept, there will be the requirement for the ability to scale with additional FHIR profiles to full production.

Question 5: We understand the requirement that the solution needs to support 300,000 citizens, however are there any projections regarding daily volume through the API layer?

Answer 5: There are no projections of daily volumes.

END OF ADDENDUM.
