1. Clarification:

Question received: There appears to be a possible duplication of volumes for some tests with similar test names and identical volumes. Can you confirm whether these are duplicates or whether they need to be combined within quoted volumes? See answer below.

Ur Calcium	Ur Calcium	169
Ur Chloride	Ur Chloride	14
Ur Creatinine	Ur Creat	364
Ur Magnesium	Ur Magnesium	42
Ur Potassium	Ur Potassium	20
Ur Protein	Ur Protein	446
Ur Sodium	Ur Sodium	80
Urine Urea Nitrogen	Ur Urea	16
Urine Uric Acid	Ur Urate	70
Urine 24 Hour Calcium	U24 Calcium	169
Urine 24 Hour Chloride	U24 Chloride	14
Urine 24 Hour Creatinine	U24 Creatinine	364
Urine 24 Hour Magnesium	U24 Magnesium	42
Urine 24 Hour Potassium	U24 Potassium	20
Urine 24 Hour Protein	U24 Protein	446
Urine 24 Hour Sodium	U24 Sodium	80
Urine 24 Hour Urea	U24 Urea	16
Urine 24 Hour Urate	U24 Urate	70

They are not duplicates. They represent random urine orders and orders on 24 hour urines. For volume purposes, the totals can be combined.
