

The Affordable Housing Development Program (AHDP) will support the development of affordable rental units. Assistance is provided to private entrepreneurs, non-profit corporations, municipalities, development corporations or housing cooperatives who are building affordable housing units in Prince Edward Island. The objective of the program is to increase the inventory of affordable rental units for those in core housing need.

Program guidelines:

- The Prince Edward Island Housing Corporation can provide a forgivable loan of up to \$45,000 per unit to support construction costs in exchange for maintaining rental rates at an affordable level.
- This program supports the planned construction of new buildings or buildings already under construction. The renovation of existing units is not eligible.
- Loan forgiveness period will be negotiated upon approval of the project but will range from 15-25 years.
- Forgivable loans for projects led by private entrepreneurs will be limited to a maximum of 50% of the units in their project.
- Municipalities, development corporations and non-profits may be eligible for forgivable loans for 100% of the units in their project.
- Prince Edward Island Housing Corporation will give preference to housing projects in the following communities that have a significant housing need based on the social housing registry:
 - Capital Region (Charlottetown – Stratford – Cornwall)
 - Montague
 - O'Leary
- Minimum unit size requirements are:
 - Bachelor/Studio: 450 square feet
 - 1-bedroom: 650 square feet
 - 2-bedroom: 850 square feet
 - 3-bedroom: 1000 square feet
- Maximum allowable affordable rental rates* are defined as the following:
 - Bachelor / 1-bedroom: \$794
 - 2-bedroom: \$961
 - 3-bedroom: \$1,118

*These rates are subject to change by the Prince Edward Island Housing Corporation.

- Rents for units not receiving program funding can be set at market rates.
- Rental rates for all units may be increased during the term of the forgivable loan based on IRAC's Allowable Rent Increases.
- Projects must be a minimum of four units.
- 20% of the units receiving a forgivable loan must be designed using accessibility guidelines within the National Building Code (section 3.8).
- Housing developments will be required to meet Net Zero Ready criteria in order to support Government's goal of reducing Green House Gases (GHGs) as discussed in *A Path Towards Net Zero (2040)*.

Applicants are required to submit the following information in their proposal:

Project Description and Applicant Background

Description of the project (e.g. building design/structure, location, PID, local amenities and services, etc.) and the applicant (e.g. contact information, experience with housing developments, etc.). The applicant should have secured the property, correct zoning and building design completed. It is not necessary to have the building permit before you submit an application but it is considered an asset. Projects currently under construction are eligible for support.

Target Market

Identify the target market for the affordable units whether it is families, seniors, or other vulnerable populations; information on any additional services that will be provided to the tenants should also be included. The Prince Edward Island Housing Corporation will select tenants for the affordable units from the social housing registry.

Design

Copies of the floor plans and building elevations should be provided. Any energy efficient design features should be highlighted, including a description of how the project achieves Net Zero Ready status (we encourage proponents to contact Efficiency PEI to identify potential modifications to the proposed design, which could result in cost savings and improved energy efficiency.)

All units must comply with NBC Accessibility Guidelines and we encourage developers to incorporate additional universal design features.

Project Funding

Comprehensive cost estimates are required for the entire project. The proposal should clearly identify the funding sources, including applicant contributions, conventional financing, other grants and/or donations. Details concerning external project financing and proposed terms are required (e.g., interest rate, term, payments, etc.). Developer must include the specific contribution sought from Prince Edward Island Housing Corporation, and the level of rent being sought for the affordable units.

Program funding will be disbursed as construction milestones are completed. The Prince Edward Island Housing Corporation mirrors the disbursement schedule negotiated with your financial institution / mortgage provider's disbursement schedule.

In lieu of loan payments, forgiveness is earned on a monthly basis until the end of the Loan Agreement, as long as the project remains in compliance with the terms. Prince Edward Island Housing Corporation will periodically review the project to ensure it continues to comply with the Loan Agreement.

Pro Forma Financial Statements

When preparing the pro forma budget, estimates provided must be for the entire building, not just the units that would be funded through this program. Revenue and expenses pertaining to any commercial components should be identified as separate line items.

Proposals will be evaluated as follows (based on 100 points):

45 Points - Ability to Meet Defined Need

- Timeline to start and complete project (unit availability date)
- Location fit with defined need of Social Housing Registry
- Number and type of units
- Unit design
- Land owned with correct zoning
- Building permits in place
- Construction started or close to completion

25 Points - Pricing

- Affordability level of funded units (monthly rental rates)
- Amount of forgivable loan requested (up to \$45,000 maximum)
- Term of agreement
- Use of partnerships and access to other funding sources (federal, municipal, community)
- Completeness and clarity of financial information

15 Points - Proponent Expertise / Resources

- Demonstrated Past experience with developing successful projects
- Clarity of proposal and ability to describe vision

15 Points - Added Value

- Total number of units added to market through project (over and above funded units)
- Use of energy efficiency / green technology – net zero ready
- Accessibility and /or universal design – over and above NBC and / or municipal requirements
- Aging in place features for units for senior population
- Other amenities / services available
- Inclusion of mixed population and mixed market units

Proposals must achieve a minimum score of 70 points to be considered for project funding. Not all projects meeting the minimum criteria will receive funding. Government is under no obligation to take any further action with respect to any submission.
