What is Pulmonary Rehab?

Pulmonary rehab is an outpatient program which aims to improve the function of people with chronic lung disease, particularly Chronic Obstructive Pulmonary Disease (COPD). The program will be provided by an interdisciplinary team consisting of a core team (physiotherapist, Nurse COPD Educator, Respiratory Therapist) as well as linkages to other health care providers (community dietitian, guest speakers such as pharmacist and occupational therapist)

Pulmonary rehab is an important component of evidence based care aimed at improving quality of life and decreasing mortality and morbidity. Program elements include: reducing modifiable risk factors, using behaviour modification strategies to sustain healthy lifestyles, promoting pharmacological adherence and providing supervised therapeutic exercise training.

All pulmonary patients can benefit from pulmonary rehab. **The pulmonary rehab program selects for high risk patients, including those with an MRC >2 & recent or frequent exacerbations, ER visits, or hospitalizations.**

*Inclusion Criteria

- A diagnosis of COPD or other chronic lung disease (e.g. pulmonary fibrosis, adult asthma, lung cancer) who are functionally disabled by their symptoms
- 18 years of age or older*
- Must be medically stable (e.g. no acute cardiac disease)
- Patient willing to participate
- Able to arrange own transportation
- Able to perform own ADL's (e.g. toileting) or bring caregiver to assist

* Exceptions may be considered on a case by case assessment

Exclusion Criteria

- Poorly controlled angina on minimal exertion
- Any medical problem that severely restricts exercise or compliance with the program e.g. severe arthritis or dementia.
- *Resides in a long term care facility

Where will the Pulmonary Rehab Program be located?

The pulmonary rehab program will be offered in Charlottetown (UPEI), Summerside (Credit Union Place), & Montague (Cavendish Farms Wellness Center). Free parking will be available for patients participating in the program.

When will the Pulmonary Rehab Program be offered?

The pulmonary rehab program will be offered once or twice a week for 12 weeks. Participants can expect to be in the clinic 1 to 2 hours for each session (approx. 3 hours per week). The sessions consist of exercise, group education, and individual counselling where appropriate. For more information contact the Program Lead.
