Footnotes:

- 1 As of 2006, total supply and total disposition of sheep and lambs are calculated using the total interprovincial import and export values instead of the net value.
- 2 A residual is arrived at by taking the number of animals leaving for farming operations outside that province minus the number of animals coming to farms within that province.
- 3 As of 2006, interprovincial import and export values of sheep and lambs are published as the total value instead of the net value.
- 4 For the January to June period, the beginning inventory is dated January 1 and the ending inventory is dated July 1. For the July to December period, the beginning inventory is dated July 1 and the ending inventory is dated January 1. The inventory data for each period cannot be aggregated to make an annual total. The inventory data is a count at a specific point in time.
