Public School Education

In Prince Edward Island, the public school system embodies kindergarten through grade 12. For program planning purposes, four Key Stages categorize grades as follows:

- Key Stage 1 - Primary grades of K-3
- Key Stage 2 - Elementary grades of 4-6
- Key Stage 3 - Intermediate grades of 7-9
- Key Stage 4 - Senior high grades of 10-12

The provincial public education program is taught in schools organized within the Public Schools Branch and La Commission scolaire de langue française.

A full school program is available for both English language and French language education. The schools of La Commission scolaire de langue française operate in the French language. Second language courses are available in all schools, with instruction beginning no later than grade four. Early French immersion and late French immersion programs are available in some English language Schools.

Additional information on public education is available on the Department of Education and Lifelong Learning website <https://www.princeedwardisland.ca/en/topic/education-and-lifelong-learning>

Philosophy of Public Education

A Philosophy of Public Education for Prince Edward Island Schools was adopted in 1990. It contains a statement of the purpose, principles, and goals, summarized below, along with the supporting rationale and context.

Purpose

The purpose of the Prince Edward Island public education system is to provide for the development of children so that each child may take a meaningful place in society.

Basic Principles

Public education in PEI is based on a quality program that respects the intrinsic value of the individual and centres on the development of each child.

The public education system recognizes that education is a responsibility shared among the school, the family, and the community.

The public education system demonstrates respect and support for fundamental human rights as identified in the *Canadian Charter of Rights and Freedoms* and the *PEI Human Rights Act*.

The public education system reflects the character, cultural heritage, and democratic institutions of the society it serves.

The public education system programs reflect a current view of the knowledge, skills, attitudes and competencies of most worth to the individual and society.

The goals of public education are to enable the student to

- develop an appreciation for learning, an intellectual curiosity, and a desire for lifelong learning;
- develop the ability to think critically, apply knowledge, and make informed decisions;
- acquire the basic knowledge and skills necessary to comprehend and express ideas through the use of words, numbers, and other symbols;
- develop an understanding of the natural world and of the applications of science and technology in society;
- acquire knowledge about the past and an orientation to the future;
- develop an appreciation for one's heritage and a respect for the culture and traditions of others;
- develop a sense of self-worth;
- develop a respect for community values, a sense of personal values, and a responsibility for one's actions;
- develop a sense of pride and respect for one's community, province, and country;
- develop a sense of stewardship for the environment;
- develop creative skills, including those in the arts, and an appreciation of creativity in others;
- develop skills and attitudes related to the workplace;
- develop good mental and physical health, and the ability to use leisure time creatively;
- acquire knowledge of the second official language and an understanding of the bilingual nature of the country;
- develop an understanding of gender equity issues and of the need to provide equal opportunities for all;

- develop an understanding of fundamental human rights and an appreciation for the worth of all individuals.

The provincial curriculum is of prime importance in addressing the goals. The curriculum may be defined as all of the experiences, formal and informal, which the student encounters under the school's guidance. This document, Program of Studies and List of Authorized Materials, outlines the formal school program.

Curriculum guides clearly articulate what students are expected to know and be able to do. Delivery of curriculum must reflect these expectations, and there must be an accurate assessment of students' performance concerning the curriculum outcomes.

English Programs

Mandate

The English Education, Programs and Services Division provides quality English language curriculum and support services to teachers and students. It provides leadership and coordination in the development of quality learning opportunities for all students.

There are more than 200 programs and courses in the public school curriculum. With such a large number of courses, course development and renewal are a continuous one. The procedures for conducting such work are described below.

Program and Course Development/Renewal Procedure

Renewal of curriculum begins with the common understanding that Grades K-12 students must be educated to participate in a world of rapid and complex change. This dynamically evolving environment requires that students develop multiple literacies that increase depth of knowledge and acquire a range of competencies. Students must also develop a desire for personal and collective achievement and a willingness to collaborate for the well-being of themselves, others, and their planet.

With these and other worthy goals in mind, everyone involved in Prince Edward Island students' education must have an in-depth understanding of grade-level expectations for learning in all areas of study.

Since the implementation of the 2006 Student Achievement Action Plan, which resulted from the PEI Task Force report on Student Achievement, curriculum development and renewal has been, and continues to be, a priority. Island teachers continue to be actively involved in working with Department leaders to create and develop provincial curriculum. The goals of curricular renewal are achieved through:

- clarifying expectations, outcomes, standards, and benchmarks for students;
- ensuring relevance and consistency for all students across grade levels and areas of study;
- focusing on central tenets and developing deep understanding within areas of study (which are living disciplines);
- incorporating effective research-based instruction and assessment practices, and providing ease of access and use for teachers; and
- promoting a contextualized and constructivist approach to instruction and learning.

Teachers and Department leaders collaborate in evaluating and selecting appropriate student and teacher resources to support the curriculum with consideration for the following six actions:

1. The Department of Education and Lifelong Learning assesses the effectiveness of existing programs and school courses in consideration of the province's educational goals and students' needs. The following information is used as part of the assessment process:
 - a. reports from teachers;
 - b. submissions from school authorities;
 - c. submissions from community groups;
 - d. government studies and initiatives;
 - e. academic and professional literature in education; and
 - f. results of provincial, national and international assessments.
2. The decision to proceed, or not, with the development of a revision project is made by the Department based upon:
 - a. the result of the assessment;
 - b. the impact on other existing courses/programs;
 - c. recommendations from appropriate curriculum committees; and
 - d. fiscal considerations.
3. The curriculum development work is carried out by an ad hoc curriculum committee in conjunction with a Department of Education and Lifelong Learning leaders. Nominations to a committee are requested from education authorities, and, if appropriate, from educational partners, such as Holland College or the University of Prince Edward Island. The committee
 - a. assesses strengths and weaknesses of the present course or program;
 - b. determines, with reference to provincial education goals and any appropriate foundation documents, the outcomes for the new or revised course;
 - c. evaluates instructional materials;
 - d. outlines a course of studies; and
 - e. makes recommendations on pilot projects and in-service training for pilot teachers.
4. Based on recommendations from the ad hoc committee, the leader
 - a. submits a request to the Director for final approval;
 - b. consults with education authorities to identify pilot schools and teachers; and
 - c. ensures that pilot materials are ordered, and that appropriate in-service training is carried out.
5. The Department of Education and Lifelong Learning monitors the progress of each pilot projects and

- a. recommends discontinuing the project, continuing the project, or proceeding to implement a new or revised course;
 - b. revises, as needed, the course of study to reflect any course changes; and
 - c. makes provision for in-service training and other supports that will ensure effective implementation.
- 6. The Department of Education and Lifelong Learning will prioritize the following areas of learning for program and course renewal;
 - a. essential graduation competencies
 - b. inquiry-based learning
 - c. project-based learning
 - d. experiential learning

Fair Presentation of Cultural and Other Groups

The Department of Education and Lifelong Learning recognizes that fair comment respecting any group is to be assured in school. Furthermore, stereotypes are to be avoided, whether in association with gender or any other characteristic. Therefore, in the curriculum planning process, curriculum committees, curriculum specialists, and the coordinator are directed as follows:

- a. To evaluate aims, instructional materials, and courses of study to ensure fair and reasoned comment upon the characteristics or practices of any cultural group. Fair and reasoned comment is characterized by, for example, providing clear and reasonably complete explanations of characteristics and practices, distinguishing between facts and inferences or value judgements in discussions of characteristics and practices, and discouraging students from making hasty value judgments about characteristics and practices of specific cultures.
- b. To evaluate educational aims, instructional materials, and courses of study to ensure that people's generalizations are based upon reasonable evidence and that stereotypes are avoided.

The resource called *Evaluation and Selection of Learning Resources: A Guide* is used to evaluate instructional materials.

The following guidelines apply in evaluating instructional materials:

1. Texts and other instructional materials should portray a wide variety of occupations, activities, and interests as being equally suitable for diverse gender identities.
2. Human experiences presented in textbooks should include references to diverse gender identities.
3. Messages about society and an individual's place in it should imply equality of diverse gender identities.
4. The resource can be accessed at www.gov.pe.ca/photos/original/ed_ESLR_08.pdf

English Programs Kindergarten Through Grade 6

A Flexible Integrated Model

Key Stages One and Two are characterized by a flexible integrated model. This is based on the following beliefs and understandings:

- Student achievement will result from a combination of discrete and connected teaching/learning experiences.
- There are commonalities among the outcomes for the curriculum areas of language arts, math, science, social studies, visual arts, technology and health, and connections will be made wherever it is logical and natural to provide for integrated learning experiences.
- This model supports 21st century learning along with the development of information literacy through a resource-based, project-based learning and inquiry process learning approach.
- Communication Information Technology (CIT) outcomes are to be integrated across curriculum areas.

Kindergarten

The kindergarten program of Prince Edward Island fosters children's growth and learning socially, emotionally, intellectually, physically, and creatively to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

The kindergarten program accommodates the broad range of children's needs and their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates various instructional models, strategies, and resources, to begin to establish fundamental knowledge and skills.

Key Stages One and Two (Grades 1-6)

For students to establish fundamental knowledge and skills, The Department of Education and Lifelong Learning has set Key Stage One goals of

- focusing on the Pillars of Literacy,
- expanding the play-based experience, and
- integrating the curriculum.

As such, students have opportunities to

- establish fundamental knowledge and skills, and
- meet grade three standards for achievement in literacy and numeracy.

For students to apply and enhance the fundamentals, the Department of Education and Lifelong Learning has set Key Stage Two goals of

- integrating the curriculum, and
- providing classroom libraries.

In Key Stage Two, students have opportunities to

- apply Key Stage One skills and knowledge,

- develop stamina,
- close gaps in learning,
- develop abstract thinking, and
- explore higher-order thinking.

Time on Task

The Grades 1-6 model acknowledges that some discrete teaching/learning must occur in the context of these specific subject areas. These curriculum areas, along with LDT (Locally Determined Time – or time that can be used to provide unique learning opportunities that are responsive to a specific school community), account for between 75% and 85% of the school day.

Key Stage One (Grades 1-3)

Language Arts – 45%	Math – 20%	Visual Arts – 5%
Health – 4%	Science – 3%	Social Studies – 3%
Physical Education – 5%	Music – 5%	
Locally Determined Time (LDT) – 5%		

Key Stage Two (Grades 4-6)

Language Arts – 30%	Math – 20%	Visual Arts – 5%
Health – 5%	Science – 5%	Social Studies – 5%
Physical Education – 5%	Music – 5%	Core French – 10%
Locally Determined Time (LDT) – 5%		

Although this is expressed in terms of a school day (300 minutes including recess – 5%), teachers may find it useful to think about time for some subject areas in terms of time blocks rather than a percentage of time each day. For example, during a six-week block, the focus may be on Science rather than social studies. In another six-week block, the focus may shift to social studies.

This model also recognizes music and physical education as distinct specialist areas. There are opportunities for integration between these specialist areas and other curriculum areas that can be capitalized on when they occur (e.g., music and language arts, music and math, music and social studies). Please note that core French is also a distinct special area in Grades 4-6.

Course Codes for Elementary School Subjects

For purposes of gathering data, a unique course code is used for each school subject. The meaning of the course codes is explained below.

The course code may be used wherever the name of a particular school subject is used in this Document.

Course Coding System

The unique course code is composed of five characters. Each course code also has a course title associated with it.

Number of Characters	Field	Description
1	Grade	K = Kindergarten 1 = Grade 1 2 = Grade 2 3 = Grade 3 4 = Grade 4 5 = Grade 5 6 = Grade 6
3	Subject	Example: MAT = Mathematics, MUS = Music
1	Program	The fifth character is used as a program identifier as well as to distinguish between courses that would otherwise be identical in their coding. A to E = English-language courses F to J = French immersion courses M to Q = French-language courses W to Z = local program courses

Examples:

3MATA = Grade 3, Mathematics, English

5LANF = Grade 5, Language Arts, French Immersion

Abbreviations

Most of the instructional materials listed for the school programs and courses described in this document appear as indicated by the following example:

Title and Author	Publisher	Ratio	Stock Abbreviation Number
Robin Run by Thorn	NEL	1/p	104-0825

Please note:

1. The publisher abbreviations and the publishers are listed on the following pages.
2. The ratios at which instructional materials are provided have meanings as indicated by the following examples:
 - 1/p - one per pupil
 - 1/10p - one per 10 pupils
 - 1/t - one per teacher
 - 1/c - one per class
 - 1/s - one per school
 - 1/u - one per education authority
 - 1/ws - one per work station
 - cs/s - one class set per school
 - cs/t - one class set per teacher
3. The item number is a unique number for each item. The numbers are assigned by the Provincial Learning Materials Distribution Centre (PLMDC).
4. There is a unique course code for each subject in the curriculum and the course code for each section is explained. Furthermore, the code is used at the beginning of the description of each course.

English Programs

Kindergarten

The following vision shapes the English kindergarten curriculum:

The kindergarten program of Prince Edward Island fosters children's growth and learning: socially, emotionally, intellectually, physically, and creatively to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

Integrated Curriculum

The following philosophy defines the kindergarten integrated curriculum:

Kindergarten is a child-centred, developmentally appropriate, early childhood program for children in the year prior to grade one. The purpose of kindergarten is to nurture the continuing growth of children's knowledge and understanding of themselves and their world by providing a safe, caring, and play-based stimulating environment where learning flourishes.

The kindergarten program on Prince Edward Island recognizes that children are individuals and that every child is unique. The program accommodates that broad range of children's needs and their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates various instructional models, strategies, and resources.

Curriculum integration provides educators with a practical approach to connect outcomes in a meaningful way. It is a holistic approach that reflects the real world and prepares children for lifelong learning. Integration is, above all, a practice that is not learned or taught but is lived.

The kindergarten program values the development of the whole child by recognizing:

- the individual and social nature of learning;
- that children learn through active involvement and meaningful play;
- the importance of developmentally appropriate practices that enhance children's learning;
- the significance of all areas of development;
- the early years as the strong foundation for lifelong learning.

Visual Arts

Rationale:

Education in visual arts is fundamental to an individual's aesthetic, physical, emotional, intellectual, and social growth. It provides students with unique ways of knowing, doing, living, and belonging in a global community of diverse cultures.

Through visual arts education, students come to understand the values and attitudes held by individuals and communities. Learning in the visual arts contributes to an empathetic world view and an appreciation and understanding of relationships among people and their environments.

Description:

The Prince Edward Island arts education curriculum is shaped by a vision of enabling and encouraging students to engage in the creative, expressive, and responsive intercultural diverse arts throughout their lives.

Students are encouraged to create ideas and images that reflect, communicate, and change their views of the world. Artistic expression involves clarifying and reconstructing personal thoughts and experiences. An essential part of art literacy is developing an understanding of the nature of the arts, which includes a sense of what artists do as individuals and as a community, how ideas are generated in the various art media, and what benefits are associated with these activities. Visual arts can be regarded as a 'text' or commentary that reflects, records, celebrates, and passes on innovations and traditions that make us unique.

The Visual Arts Program components consist of four strands: Fundamental Concepts; Creating and Presenting; Reflecting, Analysing, and Responding; and Form and Cultural Context.

Objectives of the Elementary Visual Arts Curricula:

- The instruction is developmentally appropriate.
- The creative process is being fostered by:
 - challenging and inspiring;
 - imagining and focusing;
 - planning and focusing;
 - exploring and experimenting;
 - producing and preliminary work;
 - revising and refining;
 - presenting, performing, and sharing;
 - reflecting and evaluating.
- Critical viewing is being fostered through:
 - describing;
 - analysing;
 - interpreting;
 - evaluating.
- Culturally diverse artworks and artmaking such as Indigenous artwork should be heard, expressed and supported.
- Self-expression, risk-taking, and problem-solving are promoted in students.
- A variety of open-ended visual arts experiences are being explored and created by students.
- Students are developing visual concepts, ideas, thoughts, and feelings in a variety of media.
- Students' exhibits are promoted.

- Students use personal art journals to reflect on their ideas, thoughts, feelings, knowledge, and experiences.
- Students are reflecting and responding to their own and others' artwork.
- Students' abilities and learning styles are accommodated.

Resources:

The new resources being used for Grades 1-6 are Explorations in Art: Teacher's Wrap Around Edition; and Fine Arts and Studio Process CD-ROM.

Supplementary Resources noted in the fourth column of the visual arts curricula include:

Adventures in Art (student text, teacher's edition, transparencies)

Literature support books in the other curriculum areas such as language arts, social studies, health, and science

Musical support from music program

Confederation Centre of the Arts Art to the Schools Collection www.nationhood.ca	Eptek Centre	community museums cultural festivals
---	--------------	---

Internet sites on artists, galleries, and environmental and cultural sites

Art Supplies to consider for a successful art program:

paint: liquid tempera (yellow, cyan, magenta, black, white, brown, red, orange, purple, green)

block paints (yellow, cyan, magenta, black, white, brown, red, orange, purple, green)

variety of brushes: 3/4 flat, 3/4 round, 1/4 flat, 1/4 round

scissors	pencils (H2-B6)	sponges
oil pastels (set of various colours and a set of black)	crayons	coloured pencils
newsprint	construction paper	manila paper
glue (stick & liquid)	coloured tissue paper	mural paper
modelling clay	masking tape	styrofoam trays
journal	plasticine	string
erasers	sketch pad	bristol board (for art portfolio)

Recycled and gathered material to consider for a successful art program:

found objects	natural materials	tissue rolls
yarn	cardboard	seeds
beads	fabric	pipe cleaners
magazines	tin foil	coloured mylar
sticks and wooden rods	thread/spool	paper bags
egg cartons	styrofoam trays	ice cream containers
straws	toothpicks	rubber bands
stir sticks	ribbon	sequins
buttons	lace	quills

Communication and Information Technology (CIT) Integration

Rationale:

To focus on how communication and information technology can be used from kindergarten through Grade 6 across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:

Integration of technology into the curriculum

- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks;
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

The documents Working Toward Communication and Information Technology Literacy Kindergarten to Grade 6 have been distributed and implemented. These documents contain descriptions of CIT outcomes, lesson plans, and links to specific curriculum outcomes.

These documents are also available online at:

Software, Applications, and Extensions

Approved software, applications, and extensions for student learning can be found by using the following link:
<http://bit.ly/peiapps>

This is a living resource, software, application, and extension are added or removed on an ongoing basis based on an evaluation process. Applications/extensions are available to users who log into their @cloud.edu.pe.ca accounts. These applications may be updated, changed, or added to without notice.

Core French Grades 1-3

Core French Grades 1-3 will be handled on a local pilot basis.

Core French

Description

The Core French program is taught using a literacy approach, and also reflects the influence of the action-oriented approach presented in the Common European Framework of Reference for Languages. The program focuses on the development of all four communication skills – listening, speaking, reading, and writing – in French, with particular emphasis on spoken interaction. As well, the program contributes significantly to the general education of the learner.

The program is organized around modules that reflect the interests and experiences of the elementary student with each module culminating in the completion of a final task. Throughout each module, students are actively involved in a variety of activities and tasks which allow for meaningful, authentic communication to occur in French; consequently, students acquire knowledge and language skills through their use of the vocabulary and sentence structures needed to complete various activities and tasks.

Time allocation for Core French Programs

Classes of 60 minutes every other day provide students with an authentic and intensive language learning experience. A sixty-minute class is needed, not only to maximize the opportunities for students to develop their French skills but also to teach using the literacy-based approach of the Core French program.

Cross-Curricular Integration

At the grade 1 – 3 level in Prince Edward Island, cross-curricular integration involves teaching and learning science, social studies, health, art, technology, and social and emotional learning, together rather than as separate subjects. Integration provides ways to connect curriculum with real-life experiences resulting in meaningful learning through an inquiry-based approach.

Inquiry-based learning builds on children's natural curiosity about the world in which they live. They grow their curiosity and joy of learning by asking their own questions, seeking information through field work, analyzing and interpreting their findings, and sharing their new knowledge. This approach places students' questions, ideas and observations at the center of the learning experience. It is the intention of this curriculum that the outcomes are taught through an inquiry process.

The following course descriptions provide details about the subjects that are included in the cross-curricular integrated curricula.

Science

1CrCA

Through an inquiry process, learners will develop scientific literacy in the following areas: Our Senses, Materials, Needs and Characteristics of Living Things and Daily and Seasonal Changes. Scientific literacy is an evolving combination of the science-related attitudes, skills and knowledge that learners need to develop inquiry, problem-solving and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

2CrCA

Through an inquiry process, learners will develop scientific literacy in the following areas: Properties of Solids, Liquids and Gases, Life Cycles and Motion. Scientific literacy is an evolving combination of the science-related attitudes, skills and knowledge that learners need to develop inquiry, problem-solving and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

3CrCA

Through an inquiry process, learners will develop scientific literacy in the following areas: Plants and Soils, Invisible Forces, and Materials and Structures. Scientific literacy is an evolving combination of the science-related attitudes, skills and knowledge that learners need to develop inquiry, problem-solving and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

Social Studies

1CrCA

Through an inquiry process, learners will investigate who they are, needs and wants, how people interact with one another and caring for their environment. Throughout these topics, learners will discover their own identity as well as the concept of interactions.

2CrCA

Through an inquiry process, learners will investigate how people change, how people contribute to change, and the importance of sustainability to our future. Throughout these topics, learners will explore the concept of change and how it affects their daily lives, the lives of others, and the community.

3CrCA

Through an inquiry process, learners will investigate Prince Edward Island's diverse cultural identity, climate and vegetation, and physical features. Throughout these topics, learners will explore the concepts of provincial identity, active citizenship and decision-making.

Health

1CrCA, 2CrCA, 3CrCA

Through an inquiry approach as well as direct teaching, learners will develop the knowledge, attitudes, values and life skills that young people need to make and act on the most appropriate and positive health decisions. Learners will learn and practice coping and self-management skills, decision making and critical thinking skills as well as communication and interpersonal skills that will support them in making responsible and informed choices to maintain a healthy self, a healthy community and healthy relationships. The home, school, and community play important roles in contributing to the healthy personal development of learners by providing opportunities for learners to reflect and practice skills for healthy decision making.

Additional Notes:

1. Before addressing any human sexuality outcomes, teachers must provide parents/guardians with information about the content. The minimum expectation is to inform parents/guardians by letter. An "opt-in" form must be signed by the parent/guardian and returned to the school.
2. The minimum expectation is to inform parents/guardians by letter that the personal safety/abuse prevention kit/program is being used in grades 1-3.

Health Grades 4-6

Health education involves learning about the habits, behaviours, interactions, and decisions related to healthy daily living and planning for the future. The home, school, and community play important roles in contributing to the healthy personal development of students by providing an opportunity for them to consider information and acquire, practise, and demonstrate strategies for dealing with the challenges of life and living.

The aim of the health curriculum is to enable students to make well-informed, healthy choices and to develop behaviours that contribute to the well-being of self and others.

The specific outcomes for the Grades 4-6 health curriculum are organized in three strands:

- Wellness Choices;
- Relationship Choices; and
- Life Learning Choices.

Integration of health content with other curriculum areas is encouraged.

Additional Notes

1. Before addressing any human sexuality outcomes, teachers must provide parents/guardians with information about the content. The minimum expectation is to inform parents/guardians by letter. An "opt-in" form must be signed by the parent/guardian and returned to the school.
2. The minimum expectation is to inform families of the human sexuality outcome content. An "opt-in" form must be signed by the parent/guardian of Grade 6 students and returned to the school.

Language Arts

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing. These outcomes are contained in the following documents:

- Atlantic Canada English Language Arts Curriculum: Grades Entry-3
- Atlantic Canada English Language Arts Curriculum: Grades 4-6
- CAMET Reading and Writing Achievement Standards Grades 1-6
 - Reading Achievement Standards Grade 1
 - Writing Achievement Standards Grade 1
 - Reading Achievement Standards Grade 2
 - Writing Achievement Standards Grade 2
 - Reading Achievement Standards Grade 3
 - Writing Achievement Standards Grade 3
 - Reading Achievement Standards Grade 4
 - Writing Achievement Standards Grade 4
 - Reading Achievement Standards Grade 5
 - Writing Achievement Standards Grade 5
 - Reading Achievement Standards Grade 6
 - Writing Achievement Standards Grade 6

Grades K-3 Resources

The resources for Grades K-3 are Literacy Place for the Early Years. These materials were selected to accommodate a wide range of multi-level reading materials, interests, and learning styles. The reading component of this resource includes Read Aloud, Shared Reading, Guided Reading, and Independent Reading. The writing section incorporates Modelled, Shared, Guided, and Independent Writing into text-type studies, literature responses, and independent writing. The Working With Words and Oral Language components are integrated across reading and writing activities. Literacy Place for the Early Years is based on a strategy approach to literacy teaching and learning. It includes a selection of fiction and informational text types.

Grades 4-6 Resources

The Grades 4-6 resources are Moving Up With Literacy Place. These materials were selected to accommodate a wide range of multi-level reading materials, learning styles, and interests. The resources are based on a strategy approach to literacy instruction and learning, and include eight strategy units, book clubs, and guided reading materials.

The resources from Grades K-6 are intended to engage students, inspire talk about texts, and encourage reading, viewing, writing, and other ways of representing.

The Continuum of Literacy Learning resource has been provided for all kindergarten through Grade 6 teachers. This learning continuum is designed to help educators notice, teach, and support specific behaviours and understandings that students must acquire to become highly effective readers, writers, and users of oral language. Teachers are encouraged to refer to the Program Design and Components of the English Language Arts Curriculum Guide, both Entry-3 and 4-6 for guidance and appropriate instructional practices.

Mathematics

Description

The Prince Edward Island mathematics curriculum is shaped by a vision which fosters the development of mathematically literate students who can extend and apply their learning and who are effective participants in an increasingly technological society. The teaching and learning in mathematics activities and classrooms should enable all students to:

- learn to value mathematics;
- become confident in their ability to do mathematics;
- become mathematical problem solvers;
- learn to communicate mathematically;
- learn to reason mathematically.

Fundamentally, mathematics is a set of ideas. The intent of the PEI mathematics curriculum is to ensure that students understand these ideas, not just master the rules and procedures. At the same time, it is essential that students accomplish a certain level of skill proficiency so that they have the tools to solve interesting and relevant problems. Practice of skills is usually more effective if the practice arises in meaningful contexts.

The outcomes for the mathematics curriculum are organized in terms of four content strands:

- number;
- patterns and relations;
- shape and space; and
- statistics and probability.

Intended to permeate teaching and learning, the seven mathematical processes are unifying concepts that serve to link the content to methodology. The seven interrelated mathematical processes are:

- communications;
- connections;
- mental mathematics and estimation;
- problem solving;
- reasoning;
- technology; and
- visualization.

In summary, instructional practices in mathematics should promote:

- classrooms as mathematical communities;
- logic and mathematical evidence as verification;
- mathematical reasoning;
- conjecturing, inventing, and problem-solving;
- connecting mathematics, its ideas, and its applications;
- visualization; and
- mental computation.

The PEI elementary mathematics curriculum guides provide specific curriculum guidance for teachers and students. Various mathematical manipulatives and models are mentioned throughout the curriculum and suggested resource: these hands-on tools are necessary to develop students' mathematical thinking by encouraging concrete, pictorial, and symbolic understanding of concepts.

The math curriculum has been restructured based on the Western and Northern Canadian Protocol (WNCP). This restructured curriculum and supporting resources for Grades 1, 2, and 4 were implemented in 2009-2010; Grades 3 and 5 were implemented in 2010- 2011; and Grade 6 was implemented in 2011-2012.

Music

Rationale

Within the PEI education system, music is recognized as an important component of a student's education. The benefits derived from the study of music are many and contribute significantly to a well-rounded education. Music is considered essential to fully prepare students for the world in which they live. A minimum of 90 minutes of music instructional time per 6-day cycle is required in order that the appropriate content and skills may be taught. This would equal 5% time on task.

Course Outline Information

The new Kindergarten Music includes many opportunities to explore and discover the properties of sound through singing, moving, speech, playing instruments, listening, and manipulating sounds in various ways. Through hands-on experiences and experimentation that spark imagination and curiosity, students will learn about themselves, others and the world around them. This new curriculum will develop them as a learner!

The Elementary Music Curriculum Guide, Grades 1-6 contains a description of the required program for the province.

Description

The music program is shaped by a vision of enabling and encouraging students to engage in the creative, expressive, and responsive processes of interculturally diverse music throughout their lives.

The components of the program consist of musical participation, musical understanding, musical awareness and appreciation of interculturally diverse music, and musical technologies.

Objectives

Through this program students will learn to:

- develop competency in problem solving, critical thinking, and decision-making through experiences with music;
- develop literacy in music including listening, singing, and/or playing instruments; and reading and writing music;
- develop a positive attitude towards music;
- develop an appreciation of music, and the importance of music in our own and other cultures through participation and reflection;
- develop an understanding through exploration of diverse musics such as Indigenous music and other culturally diverse musics;
- understand that music contributes to the general development of the learner.

Additional Programs:

Musical programs such as strings may be offered at schools as either:

1. an instrumental studies component in the existing music curriculum (please note that this would be a small component in the music curriculum and would not have the depth and breadth of the existing strings program); or
2. an additional program that may fit into the school's regular schedule (Locally Determined Time 5%), or as an extra-curricular offering.

The Department of Education and Lifelong Learning will continue to offer curriculum resources as outlined in the Program of Studies to any school that chooses to offer this additional program.

If strings instruction is offered, books selected from the elementary list of authorized instructional materials may be provided. The number to be allotted will be decided by the teachers concerned and the arts leader.

Physical Education

Description

The aim of the physical education curriculum is to provide opportunities for students to develop knowledge, skills, and positive attitudes toward active living. The curriculum will support students in acquiring the understandings and skills to engage in movement activities and to develop a solid foundation for a balanced lifestyle.

The specific outcomes for Grades K-6 physical education curriculum are organized within three goals. The goals are interdependent and are of equal importance. The three goals for students from kindergarten to Grade 6 are the following:

- Active Living - Students will enjoy and engage in healthy levels of participation in movement activities to support lifelong active living in the context of self, family, and community.
- Skillful Movement - Students will enhance quality of movement by understanding, developing, and transferring movement concepts, skills, tactics, and strategies to a wide variety of movement activities.
- Relationships - Students will balance self through safe and respectful personal, social, cultural, and environmental interactions in a wide variety of movement activities.

Resource-Based Learning & School Library Programs

The CAMET/APEF and Prince Edward Island curricula and programs promote resource-based learning as a key instructional approach across all grade levels, subjects, and disciplines. This means that the integrated school library program should support the development of students' information literacy through resource-based learning activities at all grade levels across the curriculum. Resource-based learning actively involves students in the effective use of a wide range of print, non-print, electronic, and human or community resources. Teachers and teacher librarians need to ensure that all students are involved in activities emphasizing skills and strategies required to think critically about the information they access, use, and apply, regardless of the source or format. They also need to assess students' learning (processes and products) for evidence of 'learning about' rather than simply 'finding out about' information-related topics, problems, and issues.

Schools should have a plan for making optimal use of the school library (facility, collection of learning resources, and instructional program), and for ensuring that students are achieving the skills outlined for their specific grade level in the School Library Skills Continuum. The school library's centralized collection of learning resources should include print material (for example, books, periodicals, including fiction and nonfiction), non-print materials (including audio, visual, databases, computer software), and the equipment necessary to manage, use, or produce them. Collections of learning resources need to be viewed from several perspectives, on-site, locally, regionally, and globally, and selected primarily to support the school curriculum and learners' needs. Library-resource centres are increasingly viewed as access points to information within and beyond the school; learning resources, including human resources, are frequently accessed or borrowed and shared among other school or public collections and from community agencies.

The selection of supplementary learning resources for school library collections is another important role of school library personnel. Support is available from the Department of Education and Lifelong Learning; and selection lists of suggested resources across the various curriculum areas, as well as information about a variety of selection aids and sources for assistance (print, online, and specialist's services) are available in the PEI School Library Handbook. The School Library Standing Committee has also developed *The Evaluation and Selection of Learning Resources: A Guide*, a document to assist educators in selecting materials.

Support for school library instructional programs is available in the form of professional development days, services offered by specialists, the revised edition of the School Library Skills Continuum, and a portion of the PEI School Library Handbook which is devoted to curriculum and instruction.

Science Grades 4-6

The PEI science curriculum is guided by the vision that all students, regardless of gender or cultural background, will have an opportunity to develop scientific literacy. Scientific literacy is an evolving combination of the science-related attitudes, skills, and knowledge that students need to develop inquiry, problem-solving, and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

4SCIA Science

Description

Students will address science-technology-society-environment (STSE), skills and processes, knowledge and attitude outcomes in the following topic areas: Habitats and Communities; Light; Sound and Rocks, Minerals, and Erosion. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

5SCIA Science

Description

Students will address science-technology-society-environment (STSE), skills and processes, knowledge and attitude outcomes in the following topic areas: Meeting Basic Needs and Maintaining a Healthy Body; Properties and Changes in Materials; Forces and Simple Machines; and Weather. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

6SCIA Science

Description

Students will address science-technology-society-environment (STSE), skills and processes, knowledge and attitude outcomes in the following topic areas: Diversity of Life; Electricity; Flight; and Space. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

Social Studies Grades 4-6

4SOCA Social Studies

Exploration

Description

The Grade 4 social studies curriculum focuses on Exploration. In Units 1 and 2, students will develop both an understanding of what exploration is, the various aspects of exploration including stories of impact on both the people exploring and the people, place, or idea explored. In Unit 3, students study the physical environment of the world, noting similarities and differences in physical features in various parts of the world. Students examine the concept of how humans and the environment interact. Students have the opportunity to examine how humans have impacted the environment and how the environment has impacted where people live and work. The final unit concentrates on Canada and examines the physical landscape of the country, the human landscape, the political landscape, and finally the symbols that give us our identity.

5SOCA Social Studies

Investigating Past Societies

Description

The Grade 5 social studies curriculum focuses on Investigating Past Societies. Students will examine the roles of historians and archaeologists in uncovering evidence from the past. They will use historical inquiry to consider how knowledge of the past is constructed. Students will examine various societies from past eras including ancient, Middle-Age, pre-Contact Canada, and early Aboriginal, French, and British, as well as any resulting interactions during and as a result of contact. Students will also study decision-making practices of First Nations and Inuit. This course concludes with students comparing their own society with societies of the past.

6SOCA Social Studies

History of Prince Edward Island

World Cultures

Description

The Grade 6 social studies curriculum focuses on two areas of study: History of Prince Edward Island and World Cultures. PEI history is designed around seven unifying ideas: Timeline, People, Transportation, Government, Economy, Lifestyles, and Culture. The study begins with a “big-picture” look at a time line of Island history and then narrowing to the past 500 years with an emphasis on changes over time. Students will work with a collaborative timeline throughout the course of study, adding events, persons, and other notable milestones along the way. The culminating activity provides students with the opportunity to reflect upon what they have learned about PEI history and its influence on their lives today. The Prince Edward Island Historic Places binder has been designed specifically to enrich students’ learning experiences throughout the Grade 6 social studies curriculum. This resource can be used to bring history to life and to bring life to history as students learn about and understand PEI’s past.

World Cultures will provide students an opportunity to explore the larger world and its diverse cultures. An integral part of this study will be world issues including the distribution of wealth, human rights issues, and the rights and responsibilities of global citizens. A Global Classroom initiative component, designed specifically for PEI classrooms, provides materials for this unit with a direct PEI - Kenya link.

While the two areas of study combined are designed to fulfill a full-year's program, approaches to delivery may vary and will be at the discretion of the teacher. An integrated approach is possible and provides opportunities to incorporate language arts, as well as other subjects, content, and skills.

French Immersion Programs

Introduction

French immersion is a school program designed to develop bilingual fluency in students as well as positive attitudes towards the French language and culture.

Objectives

- To enable students to pursue their education in either French or English.
- To develop skills for employment in which the working language is either French or English.
- To enable students to live in either English or French communities with linguistic and cultural ease.

Early French Immersion (EFI)

Starting at the kindergarten level, all or most of the instruction is given in French in all subjects. An English language arts program taking up 25% of the school day is introduced at Grade 4.

An approximate breakdown of time allocated to the French components in elementary school is as follows:

Kindergarten, Grades 1-3	- a minimum 90% French instruction
Grades 4-6	- a minimum 65% French instruction

The Department of Education and Lifelong Learning has authorized programs of study for students in kindergarten to grade twelve French immersion.

Middle Immersion (MI)

The middle immersion program begins at grade four. Most of the instruction is given in French. An approximate breakdown of the time allocated to the French/English components in elementary schools is as follows:

Grades 4-6	- a minimum 75% French Instruction
------------	------------------------------------

Time Allocation for French Immersion Programs

Kindergarten

It is intended that teachers will use an integrated delivery model through play-based learning. The integration is the drawing together of the natural connection among various curriculum areas to assist children in making sense of their world. It can be facilitated in many ways. These strategies include but are not limited to, literacy-based integration, project approach, emergent curriculum, mind mapping, K-W-L charts, the six-step planning model, and multiple intelligences.

Notes:

- 1) A minimum of 90% of instruction time in French is recommended for early immersion programs at this level.
- 2) Locally determined time, music, or physical education could be offered in French to successfully meet this recommendation.

Grades One to Three

French Language Arts 45%	Mathematics 20%
Transdisciplinary Units (Science, Health, Social Studies, Art) 15%	
Physical Education 5%	
Music 5%	Recess 5%
Locally Determined Time 5%	

Grades Four to Six

French Language Arts 25%	Mathematics 20%
Science/Health 6%	Social Studies 6%
Art 3%	Physical Education 5%
Music 5%	Recess 5%
English Language Arts 25%	

Notes:

- 1) A minimum of 65% of instruction time in French is recommended for early immersion programs at this level.
- 2) Locally determined time is integrated into language arts.

Although this is expressed in terms of a school day (300 minutes including recess - 5%), teachers will find it useful to think about time for some subject areas in terms of blocks of time rather than a percentage of time of each day. For example, during a six-week block, the focus may be on science rather than social studies. In another six-week block, the focus might shift to social studies.

The middle immersion program begins at grade four. Most of the instruction is given in French. An approximate breakdown of the time allocated to the French/English components in elementary schools are as follows:

Grades 4-6 - a minimum 75% French Instruction

Art (EFI)

Description

In grades 1-3 FI transdisciplinary units of study have been developed including the outcomes for Art. The vision is one of enabling and encouraging students to become creative, reflective, and articulate individuals who use art in learning and communicating within private, public, and technological contexts.

The components of the program consist of art expression; technique and skills development; aesthetic awareness; and cultural, historical, and environmental awareness.

Objectives

Through this program students will learn to:

- appreciate the usefulness and value of art in many genres, e.g., drama, music, film, literature, mathematics, science, and technology;
- demonstrate creative power, i.e., display confidence and competence in his/her ability to create art;
- communication through creative media expression; and
- engage in creative thinking and problem solving.

Additional Note

The resource being used, L'Image de L'Art Plus, consists of a teacher's manual, a student's text, and a kit containing reproductions of artwork.

Communication and Information Technology (CIT-FI)

Rationale:

To focus on how communication and information technology can be used from kindergarten through Grade 6 across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:

Integration of technology into the curriculum

- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks; and
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

Software, Applications, and Extensions

Approved software, applications, and extensions for student learning can be found by using the following link : <http://bit.ly/peiapps>

This is a living resource, software, application, and extension are added or removed on an ongoing basis based on an evaluation process. Applications/extensions are available to users who log into their @cloud.edu.pe.ca accounts. These applications may be updated, changed, or added to without notice.

French Language Arts

Vision

The Prince Edward Island French immersion curriculum is based on the vision of educating students who are able to communicate effectively in French, use French as a learning tool, and demonstrate an understanding of various cultures, particularly the culture of Francophone communities.

Description

French language arts make up most of the program in the early grades as teachers develop the four basic skills of listening, speaking, reading, and writing in French. The Foundation for the French Language Arts in Immersion Programs in Atlantic Canada 2001 provides a framework for the French program. A detailed curriculum guide for the French language arts program at each level is available from the French Curriculum Division of the Department of Education and Lifelong Learning.

Language Arts (English for FI) Grades 4-6

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing. These outcomes are contained in the following curriculum guides:

<i>Atlantic Canada English Language Arts Curriculum: Grades Entry-3</i>	PEI 1/t 101-1006
<i>Atlantic Canada English Language Arts Curriculum: Grades 4-6</i>	PEI 1/t 104-4007
<i>Achievement Standards for Reading and Writing End of Grade 3</i>	PEI 1/t 103-3435
<i>Achievement Standards for Reading and Writing End of Grade 4</i>	PEI 1/t 104-4431
<i>Achievement Standards for Reading and Writing End of Grade 5</i>	PEI 1/t 105-5385
<i>Achievement Standards for Reading and Writing End of Grade 6</i>	PEI 1/t 106-6360

Supplements to these guides are

English Component Early French Immersion:

Year 1 - The Transitional Year	PEI 1/t 104-4130
--------------------------------	------------------

English Component Early French Immersion: Year 2 - Grade 5	PEI 1/t 105-5132
--	------------------

Resources provided for Grade 4 are the read aloud, shared reading, and some of the guided reading books from Literacy Place for the Early Years Grade 3. Additional guided reading materials have also been provided from the Moving Up With Literacy Place Grade 4 titles.

Grade 5 resources include the Strategy units from Moving up with Literacy Place Grade 4, along with a selection of guided reading books from Moving Up With Literacy Place Grades 4 and 5.

Grade 6 resources include Moving Up With Literacy Place Grade 6.

Teachers are encouraged to refer to the Program Design and Components of the English Language Arts Curriculum Guide, both Entry-3 and 4-6 for guidance for appropriate instructional practices around spelling.

Mathematics (EFI-MI)

Description

Mathematics is more than finding the correct answer. It is a way of making sense of many aspects of the world. Through the study of mathematics, students are able to perceive patterns, comprehend data, perform calculations, make constructions, and reason mathematically.

At the elementary school level, the development of mathematical literacy (numeracy) is the major objective. Mathematical literacy includes the competencies mentioned above, but it also includes being able to communicate about mathematics through speaking, reading, writing, and listening. Elementary students must come to understand the intrinsic utility of mathematics. In doing so, they will realize how

- estimation supplements calculation;
- experience balances innovation; and
- problem-solving techniques aid rules of procedure.

The above viewpoints are derived from the goals articulated by the National Council of Teachers of Mathematics as stated in their recent publications.

More specifically, the goals of the Elementary Mathematics Program are to enable all students to

- learn to value mathematics;
- become confident in their ability to do mathematics;
- become mathematical problem solvers;
- learn to communicate mathematically; and
- learn to reason mathematically.

Living mathematical experiences in French immersion further enhances the learners' communicative abilities. They acquire and develop linguistic abilities in both official languages as many of the skills are transferable, be they mathematical, communicative, problem-solving, communicative, or metacognitive.

As of the 2010-2011 school year, all classes from kindergarten to Grade 6 use, as a principal resource, *Chenelière mathématiques* (the translation of Pearson's *Math Makes Sense*) which corresponds 100% to the WNCP (PONC) curriculum adopted by PEI.

Music (FI)

Music curriculum guides *La musique à l'élémentaire K-3^e*, and *La musique à l'élémentaire 4^e-6^e* are available from the English Curriculum Division of the Department of Education and Lifelong Learning for any school wishing to teach the music program in French. See additional notes following Grades 1, 2, 3, and Grades 4, 5, 6 in the Music section of the English Programs section on page 23.

Science (EFI-MI)

Description

The Program of Studies and curriculum guides are based on the Common Framework of Science Learning Outcomes developed as a result of a joint activity between the Council of Ministers of Education, Canada and participating jurisdictions, then harmonized for the Atlantic Provinces by participating members of the Atlantic Provinces Education Foundation.

The science curriculum must provide opportunities for children to develop a body of scientific knowledge through concrete and manipulative learning experiences. It is important to have an appropriate balance between knowledge acquisition and scientific skill development. While the two can be dealt with separately, it is more appropriate that the science curriculum involve activities which can be used to develop both content and process. As students engage in the inquiry process, they are encouraged to ask questions, to research in seek of answers, to formulate ideas in their own words, to write about their science experiences, to make connections, and to discuss and modify their findings based upon feedback from the teacher and their fellow students.

The primary material used is a kit of various resources and general equipment provided by the Department of Education. Other resources, as found in local classrooms, school libraries, and the immediate community environment can also be incorporated to facilitate integration with other curricular areas. Emphasis is placed on having students work with laboratory equipment and everyday materials in order to observe and experiment with the science concepts and processes being studied. Participating in such experiences enables students to question, to communicate, and to understand science ideas meaningfully.

Social Studies Grades 1-6 (EFI)

Grades 1-3 (EFI-MI) Grades 4-6

The Grades 1-3 program begins with a study of self and progresses through a study of family structures, the school environment, the neighbourhood, and different neighbourhoods (rural and urban). The concept of community is also introduced by having the children study community workers.

In grades 1-3 FI transdisciplinary units of study have been developed including the outcomes for Social Studies. The following concepts will be introduced and developed throughout the three years:

- Active Citizenship
- Identify, Culture and Community
- Time and Place
- Governance
- Resources and Economy

In Grades 4-6, concepts in the areas of geography, history, economics, governance, citizenship, entrepreneurship, and human rights are introduced and developed throughout the three years.

In Grade 6, a resource, titled Exploring PEI History, was implemented in the spring of 2008. The PEI history course is designed around seven unifying ideas: Timeline, People, Transportation, Government, Economy, Lifestyles, and Culture. The study begins with a “big-picture” look at a time line of Island history and then narrowing to the past 500 years with an emphasis on changes over time. Students will work with a collaborative timeline throughout the course of study, adding events, persons, and other notable milestones along the way. The culminating activity provides students with the opportunity to reflect upon what they have learned about PEI history and its influence on their lives today.

Transdisciplinary Units of Study

Grades 1-3 EFI

At the grade 1 – 3 level in Prince Edward Island, the transdisciplinary approach involves the grouping together of diverse subject content as well as competencies around big ideas, teaching these subject areas in a way that breaks down artificial barriers and provides meaningful learning through the inquiry-based approach.

Inquiry-based learning builds on children's natural curiosity about the world in which they live. They grow their curiosity and joy of learning by asking their own questions, seeking information through field work, analyzing and interpreting their findings, and sharing their new knowledge. This approach places students' questions, ideas and observations at the center of the learning experience. It is the intention of this curriculum that the outcomes are taught through an inquiry process.

The following subject areas are completely integrated within the units:

Science

Social Studies

Art

Health

There are also curricular links to the following subject areas in each unit::

Math

Technology

French Language Arts

Core French

4FREA Core French

There are 3 core modules authorized for each level. Additional modules are available for use with combined classes.

Core Modules:

Échos pro 1 professional bundle	1/t	104-4523
Échos 1 literacy package	1/t	104-4529

Module 1 – Ma classe et moi

Student text	1/p	104-4524
--------------	-----	----------

Module 2 – Ça, c'est ma journée!

If it is anticipated that a school will have a 4/5 combined class two years in a row, it is recommended that teachers start the school year with *Ma classe et moi* one year, and with *Ça, c'est ma journée* the other year.

Student text	1/p	104-4525
Mes sandwichs	12/t	105-5378

Module 4 – Les animaux et nous

Student text	1/p	104-4527
Les animaux domestiques	18/t	104-4416
À l'animalerie	18/t	104-4418

Additional Modules:

The following modules are available to schools as options once the core modules have been covered or in the case of combined grades (3/4 or 4/5). Schools should only order these modules after consultation with the Curriculum Leader.

Module 3 – Suivez moi!

Student text	1/p	104-4526
--------------	-----	----------

Module 5 – Allons au festival!

Student text	1/p	104-4528
Au soleil	18/t	104-4419
Le vent	18/t	104-4417

5FREA Core French

Echos pro 2 professional bundle	1/t	105-5418
Module 1 – La grande aventure de Samuel	1/p	105-5419
Module 2 – Ah oui! J’aime ça	1/p	105-5420
Module 3 – Ma famille et moi	1/p	105-5421
Module 4 – Les animaux: mythes et réalités	1/p	105-5422
Module 5 – Le Canada, c’est multiculturel!	1/p	105-5423
Echos 2 literacy package	1/t	105-5424

Recommended order of modules: 1, 3, 5, 4, 2

Modules #4 and #2 are options for combined classes or once the core modules have been covered.

Ressources Supplémentaires

Physical Education For Elementary School Children

Ready-to-Use P.E. Activities for Grades K-2, 3-4, and 5-6

A copy of the Prince Edward Island Physical Education Safety Guidelines document should be available in the gymnasium area. The intent of these guidelines is to focus the teacher's attention on safe instructional practices for all physical activity in order to minimize the inherent element of risk. The guidelines are mandatory.

<i>Moving Up With Literacy Place</i> Strategy Units:	SCH	1/t	
--	-----	-----	--

Self-Monitoring Unit

Teacher's Guide	SCH	1/t	
Tree of Life (book)	SCH	1/t	
Ad Busters (article)	SCH	16/t	
Boost School Spirit with Uniforms (brochure)	SCH	1/t	
Audio CD (Fluent Reading: Boost School Spirit with Uniforms)	SCH	1/t	

Analyzing Unit

Teacher's Guide	SCH	1/t	
Caring for Cheetahs (book)	SCH	1/t	
Power Up! (Magazines)	SCH	16/t	
Audio CD (Fluent Reading: Power Up!)	SCH	1/t	

Sequencing Unit

Teacher's Guide	SCH	1/t	
The Incredible Ordinary Danny Chandelier (book)	SCH	1/t	

The Great Crêpe Battle (8 overheads)	SCH	1/t
Overhead envelope	SCH	1/t
Beginner's Guide to Juggling (guide)	SCH	16/t
1 Audio CD (Fluent Reading: Beginner's Guide to Juggling, The Great Crêpe Battle)	SCH	1/t

Making Connections Unit

Teacher's Guide	SCH	1/t
Ryan and Jimmy (book)	SCH	1/t
Nets to Africa (3 overheads)	SCH	1/t
Are You Water Wise? (Poster)	SCH	16/t
Audio CD (Fluent Reading: Nets to Africa, Are You Water Wise?)	SCH	1/t

Predicting Unit

Teacher's Guide	SCH	1/t
Raven Quest (book)	SCH	1/t
Neighbourhood Nose and Tale (newspaper)	SCH	16/t
Learn to Be An Art Director (brochure)	SCH	16/t
Audio CD (Fluent Reading: Neighbourhood Nose and Tale, Learn to Be...An Art Director)	SCH	1/t

Inferring Unit

Teacher's Guide	SCH	1/t
Iqbal (book)	SCH	1/t
Poetry Beat: Rhythm and Rhyme (6 overheads)	SCH	1/t
Grandpa Promised (magazine)	SCH	16/t
Audio CD (Fluent Reading: Grandpa Promised, Poetry Beat; Songs: Homework, Zamboni, Dream Variations, I Am a Canadian)	SCH	1/t

Evaluating Unit

Teacher's Guide	SCH	1/t
The Gramma War (book)	SCH	1/t
Movie Talk: Charlie and the Chocolate Factory (5 overheads)	SCH	1/t
You Be the Judge (10 overhead)	SCH	1/t
Audio CD (Fluent Reading: Move Talk, You Be the Judge)	SCH	1/t

Synthesizing Unit

Teacher's Guide	SCH	1/t
Nokum is My Teacher (book)	SCH	1/t
Fabulous Fables (5 overheads)	SCH	1/t
The Alberta Homesteader (sheet music)	SCH	16/t
Audio CD (Fluent Reading: Fabulous Fables, Alberta Homesteader;		

Song: Alberta Homesteader)

Au parc avec grand-papa (grand livre, 6 petits 103-311 et CD) 1/c 100-409

Zap Sciences (série magenta – 20 titres - lecture guidée) TCM 3c/c 100-365

Le soleil	Une forêt tropicale
La croissance	Un arc-en-ciel
Les oiseaux	Le fauve et le chat
Est-ce en métal?	Les goûters de fête
Tu peux le faire!	Je vois
La lune	Les saisons
Notre spectacle	C'est chaud!
Cette petite semence	Les cinq sens
Les formes	Doux et rugueux
Je fais un mélange	Les traces
