

ENERGY EFFICIENCY FOR BUSINESS, AGRICULTURE AND NON-PROFITS

efficiencyPEI has a variety of rebates and incentives that could help your bottom lines.

BUSINESS ENERGY REBATES

- Choosing energy efficient products will reduce your energy consumption and help manage your operating costs.
- Investing in energy efficiency can improve the in-store experiences, deliver higher quality lighting for product displays, improve productivity and reduce your environmental impact.
- Any Island business, non-profit and institutional organization, or industrial/agricultural facility can apply for up to 50% of costs to purchase and install approved high-efficiency products and equipment in a non-residential building.

COMMUNITY ENERGY SOLUTIONS

- Up to 50% of the total energy efficiency upgrade cost, up to \$25,000.
- Incentives can help with upgrades to heating systems, optimizing ventilation, thermostats and controls, and more.
- Larger operations (using more than 350,000 kWh annually) may be eligible for custom energy solutions which can include funding for a feasibility study and access to an onsite energy manager.

SOLAR REBATE PROGRAM

- Solar energy can lower energy bills for Islanders, working hand-in-hand with other efficiency upgrades
- The solar program makes solar power more affordable by providing financial incentives for Islander businesses/facilities to install solar PV panels.
- In addition to solar rebates, financing is available through the Government of Prince Edward Island to assist with the up-front costs of solar installation.

All of these energy efficient rebate programs can be found on our website at PrinceEdwardIsland.ca/BusinessEnergy or you can call our Commercial Energy Program Manager Nick Walker at 902-620-3690 to find out how your business can qualify for an energy audit.
