

# Investing in Environment, Climate Change and Energy Futures

*Prince Edward Islanders are acutely aware of the perils of climate change and its consequent impact on our natural environment. We want to initiate efforts that lower our emissions and provide environmentally and economically sound options in all sectors.*

## Renewable, homegrown energy

*Helping Islanders at home.*

The budget continues to advance the work of the province's Climate Action Plan, Climate Adaptation Plan and Energy Strategy. \$10 million in incentives will be provided for fuel switching in existing homes and businesses and in system investments.

## Wind energy

*New 30 megawatt wind farm.*

A new 30 megawatt wind farm will be initiated this year at a total cost of \$60 million, with the goal of being operational by 2020.

## Preserving our natural environment

*Islanders understand the importance of the environment.*

A further \$200,000 will be provided for watershed research initiatives on best water practices. We will also undertake the one million trees project to help encourage reforestation.

The full Budget Address, Estimates of Revenue and Expenditure and supporting schedules for 2019-2020 and previous years are available at: [www.PrinceEdwardIsland.ca/Budget](http://www.PrinceEdwardIsland.ca/Budget)

## Addressing climate change and protecting our environment

PEI will work with our neighbouring provinces and the federal government on a regional clean energy roadmap.

*We cannot overlook the environmental and climate challenges we are all faced with.*
