

Date: _____

Subject: Authorized designated visitor for patients/residents in Health PEI facilities or Programs

To: PEI Office of Public Safety:
COVID-19 Testing Clinics:

The individual noted below has been identified as a designated visitor to one of our patients/residents and will be granted visitation privileges with their loved one.

Visitors from outside of PEI must be swabbed and receive a negative COVID-19 test result prior to the first visitation. Visitors are able to have repeat visits with the patient but are required to demonstrate they have been re-swabbed for COVID-19 according to the following schedule. Repeat COVID-19 test results are not required before visiting.

Visitors are asked to present this letter at the COVID-19 testing sites as proof of approval for COVID-19 testing. Repeat swabs will be arranged by the visitor according to the following schedule (see back page for locations/times):

- Initial test and negative result – day 0-2 of arrival to PEI.
- Second swab completed during day 4-7 of arrival to PEI.
- Third swab completed during day 10-12 of arrival to PEI.

The visitor will be notified of their initial COVID-19 test result by staff from the unit or location caring for their loved one. Receiving the result for the first test may take up to 4 hours. Visitors will only be notified of further test results if they are positive for COVID-19.

Visitors from outside of PEI are exempt from self-isolation only to visit with the patient during the specified time frame. The visitor must wear full PPE (gown, gloves, and a mask) for the duration of the visit to the health care facility. When not visiting the patient they must return directly to self-isolation.
