

# 2022 Hunting and Trapping Summary

## **Minister's Message**

Prince Edward Islander's share a long history of taking part in the annual hunting and trapping seasons. These activities contribute significantly to our Island's heritage and provide environmental, economic, social, cultural, health, and other benefits.

I encourage you to continue to enjoy and promote these activities, and to mentor novice hunters and trappers.

On behalf of the Government of PEI, I wish you a safe and successful 2022-2023 hunting and trapping season.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven Myers".

**Steven Myers**

## **Wildlife Conservation Act and Regulations**

This summary is prepared for the information and convenience of those who plan to hunt or trap in Prince Edward Island. The original act and regulations should be consulted for all purposes of interpreting and applying the law. These laws are subject to change at any time. For the complete regulations please refer to the Wildlife Conservation Act, Regulations available on request from the Forests, Fish and Wildlife Division or online at:

<https://www.princeedwardisland.ca/en/legislation/environment-energy-and-climate-action/528>

Photo Credit: Jamie French

## **Reminders, What's New, and Proposed Changes**

### **Reminders from 2021-2022:**

- Trappers are encouraged to review the “Avoiding River Otters When Trapping Beavers” section (P. 61).

### **What's New for 2022-2023:**

- Fixed season dates are now in effect for:
  - September goose season (Sept. 1-15)
  - Ruffed grouse (Sept. 26 – Dec. 31)
  - Hungarian partridge (Oct. 15 – Nov. 15).
- Beaver box traps and raccoon foot encapsulating traps now need to be approved (see p.54 for more info).
- Hunters are asked to review the updated Migratory Birds Regulations 2022 (see p. 21 for more information).

### **Proposed Changes for 2023-2024:**

- A beaver trapping restriction zone is proposed for the Malpeque-Darnley-Fox River area (see map on P. 60).

## **General Hunting Regulations**

It is unlawful to:

- 1) carry a firearm in game habitat or hunt any game unless you are in possession of a Hunter Safety Certificate;
- 2) hunt any wildlife for which an open season has not been prescribed;
- 3) without a shipping coupon take, or ship out of the province any game or parts thereof;
- 4) disturb, molest or take the nest or eggs of any game bird;
- 5) hunt any game birds by means of any trap, cage or snare;
- 6) hunt game birds with a rifle or other firearm loaded with a bullet or bullets;
- 7) use a shotgun that has a capacity of more than three shells in the magazine and chamber combined, while hunting game;
- 8) possess more than one shotgun, unless each shotgun in excess of one is unloaded and disassembled or unloaded and cased, while hunting game;
- 9) hunt on Sunday;
- 10) shoot at any game within 200 metres of any school, church, meeting place or any occupied dwelling, farm building, or livestock, without the owner's permission; or shoot any game within

- 300 metres of a location where migratory birds are kept under permit;
- 11) while in or on any vehicle, discharge or have in personal possession a loaded firearm;
  - 12) discharge any firearm in any locality where game is usually found between one-half hour after sunset and one-half hour before sunrise unless authorized by a permit to hunt raccoons at night or for the purposes a dispatching a legally trapped furbearer;
  - 13) sell fox, raccoon or coyote to anyone other than a licensed fur dealer or fur auction house representative;
  - 14) wilfully allow the flesh of any game suitable for food to be spoiled or destroyed;
  - 15) hunt waterfowl within 400 metres of an area baited with grain or other food;
  - 16) ship or take out of the province, snowshoe hare, raccoon, fox or coyote without a Game Export Permit. If pelts are held by the hunter longer than 5 days after the close of the open season, a Possession Permit is required;
  - 17) possess or use shot other than non-toxic shot for hunting ducks, geese or snipe; and crows;
  - 18) be in possession or under the influence of an intoxicant while hunting;
  - 19) possess a firearm that is not cased one hour after sunset to one hour before sunrise unless authorized by a permit;

- 20) hunt or shoot at waterfowl, including all ducks and geese, from within the highway right-of-way;
- 21) hunt waterfowl from within 100 yards of the centreline of a highway-right-of-way that is a boundary of the Indian River Wildlife Management Area, the Rollo Bay Wildlife Management Area, the New Glasgow Wildlife Management Area, or the Pisiquid River Wildlife Management Area;
- 22) use or be in possession of:
  - a. lead shot for species other than pheasant, ruffed grouse, Hungarian partridge woodcock, snowshoe hare, raccoon, coyote, fox or squirrel; or
  - b. non-toxic shot of a size greater than "T" shot
- 23) while hunting game other than coyote, use or be in possession of any shot of a size larger than
  - a. "BB" in the case of lead shot; or
  - b. Size "T" in the case of non-toxic shot
- 24) set a snare for snowshoe hare made of materials other than single strand brass wire of 20 to 24 gauge, or set a snare for snowshoe hare with a wire loop greater than 10 cm. (4 inch);
- 25) hunt foxes with cartridges larger than .22 rim fire or .17 centre fire.
- 26) intentionally or knowingly interfere with another person lawfully engaged in hunting.

**Note:** If you are in possession of migratory birds belonging to or taken by another person, each bird must be tagged with:

- a. the name and address of the owner,
- b. the number of the migratory game bird permit under which the bird was taken, and
- c. the date the bird was taken and signed by the person who killed the birds.

### **Trespass to Property Act**

All hunters and trappers are reminded that you need permission of the occupier or a person authorized by the occupier, to enter on land that is a lawn, garden, orchard, commercial berry growing area, golf course or acreage managed for the production of agricultural crops, land that is a tree plantation area or a Christmas tree management area, enclosed premises that indicates the occupier's intention to keep persons off the premises or to keep animals on the premises and engage in an activity which is prohibited on the premises by notice.

**Trappers** are also reminded that you need permission of the occupier or a person authorized by the occupier, to enter on forest land in order to trap or snare.

Photo Credit: Ben and Landon Moore

## **Residency**

A “**resident**” means a person who:

- (i) has resided in the province of a period of six months immediately prior to making an application for a licence,
- (ii) has resided in the province for a period of two weeks immediately prior to making an application for a licence, where that person proves to the satisfaction of the Minister that he or she was required to take up residence in the province as a result of being transferred to the province by his or her employer,
- (iii) is taking educational training of a three-month minimum duration within the province and has resided in the province for a period of two weeks immediately prior to making an application for a licence,
- (iv) is taking educational training outside the province and resided in the province for a period of six months immediately prior to taking the educational training,
- (v) proves to the satisfaction of the Minister that he or she has resided in the province for the purpose of employment for an aggregate period of six months within the twelve months immediately preceding the making of an application, or

(vi) was born in the province and owns real property in the province.

All other hunters are not considered to be residents and require a Non-resident Hunting Licence.

Non-resident hunters must be accompanied by either a licensed resident hunter or a registered hunting guide while hunting in Prince Edward Island.

Youth (resident or non-resident under 16 years of age) require a Hunting Licence. No youth shall use or carry a firearm except in company with a parent or guardian, subject to the provisions of the Firearms Act and Criminal Code.

**It is illegal to have in your possession, when hunting all game birds any shot larger than “BB” in the case of lead shot or size “T” in the case of steel shot.**

## Hunter Safety Certificate – PEI Wildlife Card

ALL PERSONS wishing to acquire a PEI hunting licence are required to exhibit a Hunter Safety Certificate to the licence vendor. Vendors are prohibited from issuing a licence to any person who does not possess a certificate.

All first-time hunters are required to successfully complete a Hunter Safety Course before being issued a PEI Hunter Safety Certificate. You can register at any Access PEI Centre (see page 70 for contact info) to take the course).

Changes of address or lost or stolen cards should be brought to the attention of the Fish and Wildlife Section (902) 368-4683. Non-residents are advised that Hunter Safety Certificates issued by the province, state, or country where they live are accepted in PEI.

### **Free Training and Licences for New Hunters**

The PEI Fish and Wildlife Section is offering free training and licences for first time hunters to remove barriers to potential new hunters from participating.

All hunters are encouraged to reach out to their friends and families to make them aware of the opportunity. Please call 902-368-4683 for more details.

### **Avian Influenza Virus**

For guidelines on handling wild gamebirds and avian influenza virus refer to the following link:

<https://www.canada.ca/en/environment-climate-change/services/migratory-game-bird-hunting/avian-influenza-wild-birds.html#toc7>

**Assume every firearm is loaded.**

**Control the muzzle by pointing it in a safe direction.**

## Hunting Workshop

Every September, in coordination with partners, Fish and Wildlife hosts a free hunting workshop that focuses on skills essential for safe and fun hunting experiences. The event is held at the Charlottetown Trap and Skeet Club. This year's event will be held on Saturday, September 10. Please call 902-368-4683 for more details or to register.

Member of the Charlottetown Trap and Skeet Club Provides Instruction on Shooting Fundamentals to a New Hunter at the Hunting Workshop 2021

## **Licences and Fees\***

Resident Game Hunting** (18-59 years) .....	\$5
Courtesy Resident Game Hunting (60 years and over) .....	No Charge
Youth Hunting (12-17 years - resident and non-resident youth).....	No Charge
Resident Furbearer (all ages) .....	\$5
Non-resident Hunting.....	\$75
Non-resident 3-day Hunting.....	\$60
Resident Hunting Guide.....	\$30
Non-resident Hunting Guide.....	\$50
Wildlife Conservation Fund*** • 16-64 years..... • 65 years and over.....	\$20 \$13
Snowshoe hare snaring**** .....	\$5

---

\*Above fees do not include HST

\*\*No charge for first time hunters

\*\*\*Charged once annually with first fishing, hunting or  
trapping licence purchased (cont'd next page)

\*\*\*\*Everyone who snares rabbits (Snowshoe Hare)  
must purchase a Snowshoe Hare Snaring Licence.

## Purchase a Provincial Hunting Licence

Provincial hunting licences can be obtained from authorized vendors around the province or online at:

[princeedwardisland.ca/hunting](http://princeedwardisland.ca/hunting)

Coyote (PEI Fish and Wildlife)

## Resident Game – Open Seasons and Limits

<b>Game / Furbearer</b>	<b>Open Season</b>	<b>Daily Bag</b>	<b>Poss.</b>
Pheasant	No open season	n/a	n/a
Ruffed Grouse	Sept. 26 - Dec. 31	3	6
Hungarian (Grey) Partridge*	Oct. 15 - Nov. 15	3	6
Snowshoe Hare Hunting	Oct. 1 – Mar. 31	5	-
Snowshoe Hare Snaring**	Nov. 1 – Feb. 28	-	-
Fox	Nov. 1 – Jan. 31	-	-
Raccoon	Oct. 1 – Mar. 31	-	-
Coyote	Oct. 1 – Mar. 31	-	-
Red Squirrel	No closed season	-	-

\* No open season for Hungarian (Grey) Partridge in Lots 1 to 10, inclusive, and Lots 43 to 47 inclusive (see next page).

\*\* A Snowshoe Hare Snaring Licence is required.

"-" = no limit

Shaded areas indicate lots open  
for hunting Hungarian Partridge  
during the Open Season

## **Updated Migratory Birds Regulations (MBR)**

Important updates include, but are not limited to, the following (hunters are strongly urged to review the updated MBR available online here: [Canada Gazette, Part 2, Volume 156, Number 12: Migratory Birds Regulations, 2022](#):

- Fixed September goose season (Sep. 1-15).
- Waterfowler Heritage Day is now repealed. Minors (11-18 years old) are now able to obtain both the migratory game bird hunting permit and habitat conservation stamp free of charge. Minors holding a permit will be required to hunt with a mentor who also holds such a permit. A mentor shall not hunt with more than 2 minors at a time. The mentor is now able to hunt when out with the youth they are mentoring.
- Retaining the head or wing of a hunted bird is no longer considered necessary once the bird is preserved. A bird will be considered preserved when it is plucked and eviscerated, ***and then*** frozen, made into sausage, cooked, dried, canned or smoked, or when mounted for taxidermy. Preserved birds will not count in an individual's possession limit.

## **Migratory Game Bird Hunting Permit**

To hunt migratory game birds (e.g., ducks, geese, woodcock, and snipe) in Canada, you are required to possess a valid federal Migratory Game Bird Hunting Permit (or e-Permit) with an affixed (or printed image of) Canadian Wildlife Habitat Conservation stamp (the physical stamp is not required to validate the e-Permit).

To purchase a permit online, visit:

[Purchase of a Migratory Game Bird Hunting Permit |](#)  
[Migratory Game Bird Hunting E-Permit \(ec.gc.ca\)](#)

## Migratory Game Birds – Seasons and Limits

Open Seasons		
September Goose Season	Sept. 1 – Sept. 15	
Woodcock	Sept. 26 – Dec. 12	
Ducks <sup>1,2</sup> , Geese and Snipe	Oct. 1 – Dec. 31	
Bag and Possession Limits		
Ducks <sup>1*</sup>	6*	18**
Ducks <sup>2</sup>	6***	12****
Geese (Sep. 1 to Sep. 15)	10	20
Geese (Oct. 1 to Nov. 14)	5	20
Geese (Nov. 15 to Dec. 31)	3	20
Woodcock	8	16
Snipe	10	20

<sup>1</sup> All ducks other than Common and Red-breasted Mergansers, Long-tailed Ducks, Eiders and Scoters

<sup>2</sup> Common and Red-breasted Mergansers, Long-tailed Ducks, Eiders and Scoters

\* Except that not more than one may be Barrow's Goldeneye. From Dec 1 to Dec 31, not more than four may be black ducks or black duck-mallard hybrids, or any combination of them.

\*\* Except that not more than one may be Barrow's Goldeneye

\*\*\* Except that not more than four Scoters and four Eiders may be taken daily.

\*\*\*\* Except that not more than eight Scoters and eight Eiders may be possessed

## **Waterfowl Bands**

Hunters can report bird bands (bands on legs of ducks and geese) by dialing this toll-free number: 1-800-327-2263 or visiting: [www.reportband.gov](http://www.reportband.gov). You should have the following information available before you call: 1) the band number; and 2) where and when you shot the bird.

## **Non-game Birds**

Most birds are completely protected throughout the year, including eagles, hawks, owls, seagulls, cormorants and non-game migratory birds. Non-game migratory birds are all protected under the Migratory Birds Convention Act. It is illegal to shoot such non-game migratory birds as shorebirds, herons, grebes, songbirds, and woodpeckers.

Whimbrel (Island Nature Trust)

## **Export Permits**

An export permit is free of charge and is required for all game leaving Prince Edward Island. For non-resident hunters, a valid non-resident hunting licence attached to the game being exported serves as a shipping coupon authorizing the export of game from the province by the licence holder in accordance with possession limits.

## **Furbearer Hunting**

Furbearer hunting is a popular pursuit for many Island hunters. Please note the following regulations:

- Muzzle loading firearms are permitted for coyote hunting only.
- The restriction on possessing more than one uncased shotgun while hunting game does not apply to rifles.

### **Chasing Wildlife**

**No person shall use any air, land or water vehicle to chase, pursue, worry, molest, take, hunt or kill any wildlife or willfully destroy wildlife habitat.**

## Hunting Raccoon at Night

Because raccoons are traditionally hunted after dark, hunters should be aware that their activities (dogs, lights, etc.) may alarm uninformed members of the public. Hunters should make every effort to advise residents before they hunt in that area. Landowner permission should be obtained prior to accessing private property for the purpose of hunting. Hunting raccoon at night requires a special permit available from Fish and Wildlife at 902 368-4683.

Raccoon (PEI Fish and Wildlife Section)

## Hunting License Sales and Harvest Statistics

Figures illustrating multi-year license sales and estimated harvests for waterfowl and ruffed grouse are provided on the following pages. Harvest estimates were derived from annual phone surveys of randomly selected PEI license holders (# of survey participants ranged between 130 to 240 over the past 4 seasons.

**Estimated Ruffed Grouse Harvest  
(2018-19 to 2021-22)**

### Estimated Waterfowl Harvest (2018-19 to 2021-22)

## **How to Reduce Lead Poisoning**

- Use non-toxic shot for all shotgun and rifle hunting. Non-lead alternatives are now readily available and becoming cheaper every year. Save your lead for the range and target shooting.
- If lead ammunition is used, recover or remove all shot game from the field
- If the carcass must be left in the field, burying the carcass prevents scavenging.

## **Bald Eagles and Lead Poisoning**

- Lead, ingested in large enough quantity has negative effects on the nervous, reproductive, respiratory, and gastrointestinal systems of mammals and birds
- Dead eagles recovered on the Island have tested positive for lead poisoning
- Eagles frequently scavenge carcasses of dead animals that may contain lead bullet fragments or lead pellets
- Symptoms of lead poisoning in eagles include loss of balance, gasping, tremors and impaired ability to fly
- Eagles are especially sensitive to lead poisoning, 2-3 #6 shot is enough to kill an eagle

- Depending on the amount ingested, eagles can die within hours - days (acute poisoning) or become emaciated and die over 2-3 weeks (chronic). Sublethal lead poisoning may also interfere with flight, eyesight, and normal behavior making them prone to traumatic events.

## **Wear Your Personal Floatation Device!**

### The Truth About Cold Water Immersion (by Mario Vittone)

You Can't Breathe: The first phase of **cold-water** immersion is called the cold shock response: It is a stage of increased heart rate and blood pressure, uncontrolled gasping, and sometimes uncontrolled movement.

Lasting anywhere from 30 seconds to a couple of minutes depending on several factors, the cold shock response can be deadly all by itself. In fact, of all the people who die in cold water, it is estimated that 20% die in the first two minutes. They drown, they panic, they take on water in that first uncontrolled gasp, if they have heart problems – the cold shock may trigger a heart attack. Surviving this stage is about getting your breathing under control, realizing that the stage will pass, and staying calm.

You Can't Swim: One of the primary reasons given by recreational boaters when asked why they don't wear a life jacket is that they can swim. Listen up, Tarzan; I swam for a living for the better part of my adult life, and when the water is cold – none of us can swim for very long.

The second stage of cold-water immersion is called cold incapacitation. Lacking adequate insulation your

body will make its own. Long before your core temperature drops a degree, the veins in your extremities (those things you swim with) will constrict, you will lose your ability control your hands, and the muscles in your arms and legs will just flat out quit working well enough to keep you above water. Without some form of flotation, and in not more than 30 minutes, the best swimmer among us will drown – definitely – no way around it.

Without ever experiencing a drop in core temperature (at all) over 50% of the people who die in cold water, die from drowning perpetuated by cold incapacitation.  
From: [www.gcaptain.com/cold\\_water/](http://www.gcaptain.com/cold_water/)

Photo Credit: Matt Wedge

Over 90 percent of hunters who die while boating are not wearing a lifejacket. When you fall overboard, a lifejacket stored under your seat will do little to save your life. Before you head out on the water, make sure you wear a lifejacket that fits and is in good working order.

Hunters are reminded to be sure to carry proof of competency such as a Pleasure Craft Operator Card, and photo ID, if they are operating a boat fitted with a motor. To prepare for a safe hunting or fishing adventure, visit or call:

- [www.tc.gc.ca/eng/marinesafety/debs-obs-menu-1362.htm](http://www.tc.gc.ca/eng/marinesafety/debs-obs-menu-1362.htm)
- 1-800-387-4999 to speak with a Boating Safety Officer.

## **General Trapping Regulations**

Trapping has been restricted on certain public lands, including the Demonstration Woodlots and some Natural Areas. Please contact the Fish and Wildlife Section for more information.

No person shall:

- 1) while in wildlife habitat, possess or set a trapping device unless the trapping device is:
  - a. a box trap;
  - b. a body-gripping trap that is designed to kill quickly;
  - c. a submarine trap;
  - d. a non-powered snare; or
  - e. a steel-jawed trap that has a jaw spread of less than 19 cm (7.5 inches).
- 2) set a trap designed to hold animals alive without examining each trap at least once a day.
- 3) set a snare designed to kill a fox or coyote without examining each snare at least once every 48 hours.
- 4) set any trapping device without checking it at least every 72 hours
- 5) set a toothed trap, a deadfall or a hook.
- 6) use a running pole set or a spring pole set in combination with a foothold trap.

- 7) place a trap or snare in wildlife habitat, either set or unset, before the opening of the trapping season for each species.
- 8) leave a trap or snare in wildlife habitat, either set or unset, after the close of the season for each species.
- 9) be in possession of a green hide, pelt, carcass or any portion thereof of any beaver, muskrat, raccoon, fox, coyote, mink, weasel, skunk or squirrel between the 5th day after the close of the open season and the first day of the next open season without a permit
- 10) cut, spear, break, destroy or interfere with any beaver
- 11) break, interfere with, destroy, remove or otherwise disturb any trap not registered to that person. This section shall not apply to enforcement officers responsible for the enforcement of trapping regulations in the discharge of their duty.
- 12) during the closed season for mink, set traps for or attempt to trap raccoon in places frequented by mink, or at any time during the closed season for mink, attempt to trap raccoon by use of traps set in water.
- 13) set a trap within the highway-right-of-way in any location other than in or over water

- 14) take or attempt to take any beaver, mink or muskrat by any means other than trapping.
- 15) set a trap inside an active muskrat house.
- 16) ship raw furs from the province (PEI) without first obtaining an Export Permit.
- 17) trap on private property without asking permission of the landowner.
- 18) buy the pelts or hides, either skinned or unskinned, of wild furbearing animals in PEI without being the holder of a valid Fur Dealer's Licence.
- 19) everyone is guilty of an offence who sells furs to a resident or non-resident who is not the holder of a Fur Dealer's Licence.

Red Fox (PEI Fish and Wildlife)

## **Trapping in High Use Areas**

Given the limited amount of wilderness on PEI, trappers and other outdoor recreationists often make use of the same areas. While trapping and other activities such as hiking, birdwatching, and nature photography can absolutely coexist, the potential for conflict is increased in these areas.

Trappers are asked to exercise discretion when trapping in areas of high public use; set away from trails, avoid using baits and lures, and check all traps as frequently as possible. In some cases, avoiding trapping in specific areas altogether may be advised.

Trapping has been restricted on certain public lands, including the Demonstration Woodlots and some Natural Areas. Please contact the Fish and Wildlife Section for more information.

Being proactive and working together to recognize conflict situations before they occur will help to ensure that trapping continues to play an important role in the lives of hundreds of Islanders every fall and winter.

## Trapping Seasons

Furbearer	Open Season
Beaver, Mink, Muskrat, and Weasel	8:00 a.m. Nov 1 – March 31
Fox (modified foothold only) *	November 1 – November 14
Fox (snare and trap)	November 15 – January 31
Raccoon**	October 15 – March 31
Coyote (snare and trap)	October 15 - November 14 February 1 - February 28
Coyote (modified foothold only)*	October 15 – November 14 February 1 – February 28
Red Squirrel	No closed season
Skunk	No closed season

\*A “modified foothold trap” is a foothold trap that has been altered to improve the humaneness of the trap by laminating the jaws, off-setting the jaws or padding the jaws.

\*\* From October 15-31 traps set for raccoon are restricted to locations at least 3 meters away from a wetland or watercourse.

## **Trapping Licences and Fees\***

Resident Trapping (18 and older) .....	\$10
Junior Trapping .....	\$5
Resident Fur Dealer.....	\$25
Non-resident Fur Dealer.....	\$175

\*(+ HST)

Trapping licences may be obtained from the Fish and Wildlife office, 183 Upton Road, Charlottetown, or from the Access PEI Centre in your area.

A trapper will be required to take a trapper education course after the date of conviction before purchasing another trapping licence.

## **Trapping Licences**

- 1) Any person who traps furbearing animals must be the holder of a Trapping Licence or a Junior Trapping Licence.
- 2) The Minister may issue a Trapping Licence to an applicant who is 16 years of age or older and has successfully completed a trapper education course. A Junior Trapping Licence may be issued to an applicant who is under 16 years of age and has successfully completed a trapper education program.

- 3) A trapper who has not held a valid trapping licence within the previous five years must successfully complete a trapper education program prior to being issued a trapping licence, unless the Minister exempts that person from this subsection.
- 4) All licensed trappers are issued a permanent trapper registration number (a combination of letters and/or numbers) and the metal dies for stamping their registration number on traps and snares. No person shall set a trap or snare for furbearing animals unless the trap or snare is clearly stamped or tagged with their trapper registration number.

Snowshoe Hare (PEI Fish and Wildlife Section)

## **Foothold Traps**

- 1) No person shall set a foothold trap for taking furbearing animals unless:
  - a. the trap is set for beaver, mink or muskrat and is attached to a device that is designed to submerge the animal and prevent it from resurfacing;
  - b. the trap is set for muskrat or mink and is sufficiently heavy to submerge the mink or muskrat and prevent the animal from resurfacing;
  - c. the trap is set for a raccoon and it is an approved foot encapsulating trap listed in Schedule D;
  - d. the trap is set for coyote or red fox and has been modified to improve humaneness by such means as laminating the jaws, off-setting the jaws, padding the jaws, or other similarly effective means of improving the humaneness of the trap.

## **Body-gripping Traps**

- 1) No person shall set a body-gripping (Conibear type) trap having a jaw spread greater than 16 cm (6.3 inches) but not greater than 19.6 cm (7.75 inches) except:
  - a. in or over water
  - b. in a dog-proof enclosure or
  - c. where the trap is set at least five feet off the ground.
- 2) A dog-proof enclosure set using a body-gripping trap with a jaw spread 17.8 cm by 17.8 cm (7 inches by 7 inches) or larger shall have
  - a. an opening no greater than 17.8 cm by 17.8 cm
  - b. an opening no greater than 20.3 cm (8 inches) in height and no greater than 25.4 cm (10 inches) in width with the trap trigger set back at least 25.4 cm (10 inches) from the opening.
- 3) A dog-proof enclosure with an opening larger than 20.3 cm (8 inches) in height and greater than 25.4 cm (10 inches) in width shall be placed so that no part of the opening is more than 17.8 cm (7 inches) off the ground.
- 4) No person shall set a body-gripping trap having a jaw spread larger than 19.6 cm (7.75 inches) unless partially submerged in water or in a dog-

- proof enclosure in accordance with sections 2 and 3.
- 5) A person may only use a body-gripping trap that is listed in Schedule C as approved as a killing trap for use on land for that species to take a, raccoon, weasel or muskrat on land.
  - 6) A person may only use a body-gripping trap to take a beaver or muskrat underwater if one of the following applies:
  - 7) the trap is listed in Schedule C as approved as a killing trap for use underwater for that species;
  - 8) the trap is set for muskrat and prevents
  - 9) the muskrat from resurfacing.

Skunk (PEI Fish and Wildlife Section)

## **Snares**

- 1) No person shall place in wildlife habitat any snare larger than single strand brass wire of 20 gauge except during the open season for snaring red fox or coyote.
- 2) All snares larger than 20 gauge single strand brass wire must be equipped with a self-locking device. This section does not apply to snares set under water during the open season for beaver.
- 3) No person shall set a snare for coyote or fox within 50 metres of a bait unless the bait is camouflaged or concealed in a manner that renders the bait undetectable from the air. This does not apply to bait placed in open fields.
- 4) No person shall have in possession untagged snares while in wildlife habitat.
- 5) No person shall set a snare within 200 metres of an occupied dwelling without the permission of the homeowner or occupier.
- 6) No person shall set a baited snare within 300 metres of an occupied dwelling without the permission of the homeowner or occupier.
- 7) No person shall set a snare for coyote or red fox unless the snare is constructed of wire cable having a minimum size of 1.98 millimetres or 5/64 inches.
- 8) No person shall set a snare for coyote or red fox within the highway right-of-way.

## SCHEDULE C

The following pages provide lists of approved body-gripping traps for beaver, muskrat, weasel and raccoon in Prince Edward Island (certified under the Canadian Trap Certification Program and approved for use in killing raccoon in Prince Edward Island).

### Raccoon

Traps approved for use on land:

Bélisle Classic 220	LDL C 220
Bélisle Super X 160	LDL C 220 Magnum
Bélisle Super X 220	LDL C 280 Magnum
Bélisle Super X 280	Northwoods 155
B.M.I. 160 Body Gripper	Rudy 160
B.M.I. 220 Body Gripper	Rudy 160 Plus
B.M.I. 280 Body Gripper	Rudy 220
B.M.I 280 Magnum Body Gripper Bridger 160	Rudy 220 Plus
Bridger 220	Sauvageau 2001-6
Bridger 280 Mag	Sauvageau 2001-7
Bodygripper Duke 160	Sauvageau 2001-8
Duke 220	Species-Specific 220
Koro #2	Dislocator Half
LDL C 160 Magnum	Magnum Woodstream
LDL C 160	Oneida Victor
	Conibear 160
	Woodstream Oneida
	Victor Conibear 220

## **Beaver**

Traps approved for use underwater or partially submerged:

Breathe Easy Live Beaver Trap

Comstock 12 x 18 x 39 Swim Through Beaver Cage

Dam Beaver Live Beaver Trap

EZEE Set Live Beaver Trap

Hancock Live Beaver Trap

Koro "Klam" Live Beaver Trap

## **Sarcoptic Mange**

Hunters and trappers are encouraged to be mindful of mange during this hunting and trapping season, and to contact Fish and Wildlife at 902-368-4683 if you notice any signs of the disease in your harvest.

Sarcoptic mange is a disease that affects wild mammals, such as foxes, coyotes, and raccoons and can lead to pronounced hair loss, emaciation, and eventual death of affected individuals. Caused by an infection with the mite *Sarcoptes scabiei*, mange can spread quickly through a local population, particularly when there is a high density of animals in an area. In some cases, local mortality can be quite high.

Signs to look for include hairless patches of skin and crusty skin growths in around the tail, hock, neck, and face. Tracking the distribution of the disease will help inform management decisions. Hunters and trappers are at risk of contracting the infection as well, which may result in an itchy rash. You are encouraged to always wear gloves when handling your harvest, regardless of if the animal shows obvious signs of disease.

The following image shows mange reports recorded by PEI Fish and Wildlife between 2018-2021.

## **Trapping Statistics**

Historic lows were observed in the harvests of several furbearer species last season, including beaver and red fox. Raccoon and mink harvests also continue to be markedly depressed relative to historic norms. Low harvests are fueled by greatly reduced trapper effort rather than concerns around species abundance; pelt prices at this time are not enough to motivate trappers to fully participate. Chaotic world conditions create an unstable fur market, resulting in wide fluctuations in interest among global fur buyers.

This is particularly problematic for species for which trapping is an important component of population management, such as beaver and raccoon. Fish and Wildlife is studying options to incentivize harvest of these species as resources during regulated open seasons as opposed to nuisance trapping as pests outside of the open season.

## Wild Fur Harvest

## Coyote Pelts

## Beaver Pelts

## Raccoon Pelts

## Muskrat Pelts

## **Beaver Trapping Restrictions for 2023-24**

To minimize accidental take of otters during the trapping season, a restricted beaver trapping zone is proposed for the Kensington – Malpeque – Darnley - Fox River areas in 2023-2024 (see image below).

**Proposed 2023-2024 Restricted Beaver Trapping Zone**

## Avoiding River Otters When Beaver Trapping

Since 2016, nine river otters have been trapped or found dead in PEI. Targeted monitoring for river otter has produced dozens of images, including images of young of the year, and several anecdotal observations from the public have also been received. Based on this evidence it is reasonable to believe that at least a small, resident population of river otters has re-established in the province.

Across their range, otters are often captured in beaver traps as these species share habitats and semi-aquatic lifestyles. To minimize the risk of capturing otters, beaver trappers on PEI are encouraged to consider the following when making their sets:

- Avoid the use of 280 conibears, as river otters cannot swim through them without firing the trap;
- Move trigger wires on 330 conibears as far as possible to one side to allow otters to swim through without firing the trap;
- When trapping beaver runs with conibears, place traps on the bottom of the run with a dive stick at the surface;
- Avoid placing traps close to the crossover of beaver dams, as river otters frequently use these features as travel routes;

- Set foothold traps for beaver at least 8" below the water's surface.

(Kensington North Watersheds Association)

## **PEI Wildlife Conservation Fund**

### Putting your money to work!

When you pay a PEI Wildlife Conservation Fund fee, you are helping to improve habitat for many of PEI's fish and wildlife species.

In 2021, approximately \$302,000 was awarded to watershed, wildlife and environmental groups across PEI to restore, protect and improve Island fish and wildlife habitat. Research and education projects are also regularly funded. Spring 2022 WCF has awarded approximately \$240,000. Groups awarded WCF funds in 2021 are listed below.

- Abegweit Biodiversity Enhancement Hatchery
- Abegweit Conservation Society
- Atlantic Canada Conservation Data Center
- Bedeque Bay Environmental Management Association
- Belfast Area Watershed Group
- Canadian Wildlife Health Cooperative (UPEI)
- Cascumpec Bay Watershed Association Inc.
- Central Queens Branch of PEI Wildlife Federation
- Cornwall Area Watershed Group
- Ducks Unlimited Canada
- Ellen's Creek Watershed Group Inc.
- Hillsborough River Association Inc.
- Hunter-Clyde Watershed Group

- Island Nature Trust
  - Kensington North Watersheds Association Ltd.
  - Lot 11 & Area Watershed Management Group
  - Morell River Management Cooperative
  - Natural History Society of PEI
  - Nature PEI
  - PEI Chapter Delta Waterfowl
  - PEI Watershed Alliance Inc.
  - Pisiquid River Enhancement Project
  - Prince Edward Island Invasive Species Council
  - Richmond Bay Watershed Association Inc.
  - Sierra Club Canada Foundation
  - Souris and Area Branch of the PEI Wildlife Federation
- South Shore Watershed Association
- Stratford Area Watershed Improvement Group
  - Tignish Watershed Management Group
  - Trout River Environmental Committee
  - West Point & Area Watersheds Inc.
  - Wheatley River Improvement Group
  - Winter River-Tracadie Bay Watershed Association

## **Investigation and Enforcement**

For enforcement of any of the environment acts or regulations during regular working hours, telephone a Conservation Officer at any of the following locations:

Wellington - 902 854-7250

Summerside - 902 888-8000

Charlottetown - 902 368-4884

Queens County - 902 368-4884

Montague - 902 838-0600

Souris - 902 687-7000

For environmental emergencies after normal office hours telephone 1-800-565-1633. For wildlife related enforcement after normal office hours telephone: 902 368-4884

## **Equipment Seizure and Forfeiture**

Hunters and trappers are advised that seized equipment shall be automatically forfeited to the crown for the following offences:

- 1) all second offences,
- 2) taking game or wildlife out of season,

- 3) hunting while under suspension, and
- 4) possession of a loaded firearm in a vehicle or boat
- 5) possess or be under the influence of an intoxicant.

An automatic one-year suspension of hunting privileges can result from a conviction under the Wildlife Conservation Act or Regulations or the Migratory Birds Convention Act or Regulations

**Report a Poacher**

**1-800-222-8477**

**TIPS**

**Report poachers and polluters!**

## Courses and Workshops

Each year, the Forests, Fish, and Wildlife Division offers a variety of courses and workshops. If you are interested in any of the following training opportunities, please contact our office at 902-368-4683.

- Trapper Education
- Hunting (Hunter Safety, Bow hunting, Hunting Guide)
- Becoming an Outdoors Woman workshop
- Youth Waterfowl Hunting Workshop
- Chainsaw (Weekend Woodsman, Chainsaw Filing, Cutting Firewood Safely, Basic Silviculture Lesson Plan)

Kevin Arsenault and Carl Balsor teaching trapping techniques.

## Accessing Public Lands

While most of Prince Edward Island is privately owned, there are areas of forest and wetland which are available for public use - the Island's 33,000 hectares of public land. In general terms, these properties are classified as Natural Areas, Ponds and Wetlands, Provincial Forests, and Wildlife Management Areas. They are managed for a variety of public values and benefits such as recreation, wildlife habitat, protection of unique or rare species, high-value timber and non-timber forest products, forest/wildlife research, and outdoor education.

The signs listed above identify public lands which are open to the public for uses such as hunting, fishing, hiking, bicycling, bird watching, tours and outdoor education. However, some uses such as off-road vehicle (ATVs, snowmobiles, etc.) are only permitted on certain properties and open fires are not permitted at all. Prohibited uses are listed on the signs. Please do not litter or smoke on these properties.

Many of these properties are working forests, so as conditions dictate, forest harvest and management operations may occur. In all cases, harvest sites on public land are quickly renewed to forest cover.

You can access more information on the location of public lands on-line at:

<http://www.gov.pe.ca/gis/index.php3?number=1017147&lang=E>

or, by purchasing a Public Land Atlas at any Forests, Fish and Wildlife office.

Pheasant (PEI Fish and Wildlife)

## **Using Vehicles to Chase Wildlife**

The use of vehicles such as ATVs and snowmobiles to assist in hunting activities has expanded in recent years, particularly during coyote hunts with hounds. If used properly, these vehicles can be very useful in such hunts to locate and retrieve hunting dogs and to access remote areas. The distinction between chasing game and following hunting hounds can be subtle, but hunters are reminded that it is unlawful to use these vehicles to actively pursue or chase game. If the vehicle is determined in any way to be harassing wildlife, or is part of the party actively pursuing game, then the hunter may be subject to legal action. Moreover, the act of chasing game with vehicles is unethical, detracts from the sport, and is not supported by fellow hunters or the general public. Hunters are encouraged to keep these points in mind this season, and to call enforcement staff if they observe others acting unlawfully in their pursuit of game.

## **BUY AND BURN LOCAL**

Moving firewood can spread invasive pests that we could all suffer from. Imported firewood can be disposed of at disposal bins located in Borden and Wood Islands. For more information go to [peiinvasives.com](http://peiinvasives.com).

Firewood disposal bin located in Borden, PE.

A single piece  
of firewood  
can **DESTROY**  
millions of trees.

Moving firewood, even just a few kilometres away,  
can spread invasive insects and diseases to our forests.

**BUY LOCAL, BURN LOCAL  
DON'T MOVE

## **Hunter Harvest Log**

Harvest reporting is one of the best and most important sources of information used to guide the management of game species. Hunters are encouraged to use the tables below to keep track of their harvest and effort (no. of animals harvested, no. of hours spent hunting) throughout the hunting season and to share the information with the Fish and Wildlife Section after the season has ended.

<b>Hunter Harvest Log</b>			
<b>Date</b>	<b>Hours Spent Hunting</b>	<b>Species</b>	<b># Harvested</b>

Hunter Harvest Log			
Date	Hours Spent Hunting	Species	# Harvested

Hunter Harvest Log			
Date	Hours Spent Hunting	Species	# Harvested

Hunter Harvest Log			
Date	Hours Spent Hunting	Species	# Harvested

## **Trapper Harvest Log**

Harvest reporting is one of the best and most important sources of information used to guide the management of game species. Trappers are encouraged to use the tables below to keep track of their harvest and effort (no. of animals harvested, no. of traps set, no. of trapping nights, etc.) throughout their trapping season and to share the information with the Fish and Wildlife Section after the season has ended.

<b>Trapper Harvest Log</b>			
<b>Date</b>	<b># of Traps Set</b>	<b>Species</b>	<b># Harvested</b>

Trapper Harvest Log			
Date	# of Traps Set	Species	# Harvested

Trapper Harvest Log			
Date	# of Traps Set	Species	# Harvested

Trapper Harvest Log
