Q4 Jan-Mar	89	5.6	5.0	0	57	9.2	97%

† Statistics are based on patients without external delays. External delays are defined as a delay before it is appropriate to have a consult appointment. External delays for a consult may take place because of a pre-existing medical condition needing attention, scheduled procedures or treatments needing to take place (e.g. surgery), or due to patient requests to delay their consult appointment.
