<b>Fiscal 2017-18</b>	<b>417</b>	<b>89%</b>	<b>569</b>

Data Source: ARIA System

† Statistics are based on patients without external delays. External delays are defined as a delay before it is appropriate to have a consult appointment. External delays for a consult may take place because of a pre-existing medical condition needing attention, scheduled procedures or treatments needing to take place (e.g. surgery), or due to patient requests to delay their consult appointment.
