

CLASS IV - Ambulances, Taxis, Vans/Buses (10-24 passengers)

Requirements of driver for class IV

1. Driver cannot be in the Graduated Driver Licence Program
2. Appointment fee
3. **Current Medical certificate (must be completed and approved prior to road test)**
4. Vision check
5. Vehicle pre-check
6. Road test (including parallel parking) valid registration, insurance, valid inspection (If registered as a bus, must be inspected every 6 months), and a valid P.E.I. driver's licence
7. Vehicle must be in good mechanical condition and all seat belts in working order. **The Class IV driving test will be conducted in a full size passenger van or cargo van only, to be supplied by the applicant.**

Pre-Operating Inspection

Under Engine/Hood

Check all fluid levels, oil, water, power steering, brake fluid, battery, cables, connections, hoses for leaks, belts, radiator, and wires.

In Cab

- Adjust seat, mirrors
- Start engine properly
- Check instrument panel for oil pressure, water, etc., gauges (if any), speedometer must work
- Check brake, clutch, accelerator, steering wheel for free play
- Check horn, wipers, washers, dome lights, heater(s), defroster
- Check fire extinguisher, first aid kit and flares (if required)
- Seats anchored, exits secured, all available seat belts
- Turn on lights, head lights and right turn signal

Outside Light and General Check

- Check wiper blades, windshield (for cracks), inspection sticker
- Check tires, lug nuts, air pressure, leaks, tire wear, suspension, springs, shocks, etc.
- Check all doors, glass, plate lights and valid licence plate, spare tire, gas cap, jack, wheel wrench, and plate condition
- Check all lights - headlights, high-low, four-way flashers (front and back), brake lights, reverse lights, markers, signal lights, any fresh body damage
- Before leaving, check parking brake and service brakes

Before you have your licence upgraded, the pre-check must be completed satisfactorily before road test will be conducted.

**Transportation and
Infrastructure Renewal**

Pre-check format

Pre-Check Inspection

The drawing above shows a general method of making a systematic circle check before taking out a vehicle at the beginning of a day's work. Details of the check can, of course, be varied according to the type of vehicle, but generally the principal of making a complete circle must be followed in all cases. The applicant will be required to locate and give a verbal description explaining the pre-check items to examiner without use of this form as guide on the test date.
