

## Wildlife Conservation Fund Applicant Information

The Wildlife Conservation Fund Committee has issued a call for Spring 2017 WCF project funding proposals. Interested applicants must complete and submit the Spring 2017 Application Form by 5:00 pm Monday, February 6th, 2017. If this PDF does not work as it should (it is a fillable form), applicants may complete it by printing it and filling in the information manually or by contacting the WCF Administrator (Island Nature Trust) for a Word version.

### Evaluation Criteria for Project Applications

Applications are evaluated on a case-by-case basis and must demonstrate a need for the funds requested.

The Wildlife Conservation Fund Committee evaluates applications based largely on the following:

- projects must demonstrate a direct benefit to Island wildlife and/or wildlife habitat;
- presence of matching funds (in-kind and cash) in the budget;
- achievable project that can be completed and a final report submitted by December 31, 2017;
- track record of the applicant

Note: For research projects, applicants must attach the hypothesis, methodology, and a description of any practical applications resulting from the research

The PEI WCF Committee will not consider applications from groups whose 2016 final reports were more than two weeks late or who have failed to report in previous years.

For additional information please review the Wildlife Conservation Fund Guidelines
